Only an IT Thing? Leading the AI Agenda: The Role of CIOs versus CTOs in Shaping AI Orientation Maximilian Fröhlich, 2026-02-19 Master's Thesis from the year 2025 in the subject Business economics grade 1-3 University of Münster Lehrstuhl für Entrepreneurship language English abstract Abstract With the growing significance of artificial intelligence AI the examination of a company's overall strategic alignment towards the

development and use of AI referred to as AI orientation has captured increased attention in the literature. However, the impact of technology-focused TMT roles on such strategic alignment in U.S. companies remains ambiguous. Building on Upper Echelons Theory, this study investigates the influence of chief information officers (CIOs) and chief technology officers (CTOs) on firms' AI orientation by analyzing question and answer sections from earnings conference calls. Based on the premise that IT and AI investments are strongly interdependent within firms, this study also explores the moderating effect of industry IT intensity. Using a panel dataset comprising 3,811 firm-year observations of U.S. S&P 500 companies from 2012 to 2020, the results confirm a positive effect of CTO presence on AI orientation. Unexpectedly, no significant effect of CIO presence or a moderating effect of industry IT intensity on the relationship between CIO/CTO and AI was identified. These findings not only highlight the strategic importance of the CTO role in U.S. companies but also underscore differences between CIO and CTO roles. This study contributes to the literature by exploring the distinct impacts of specific TMT roles on AI orientation in U.S. firms and identifying relevant areas for future research, such as a deeper analysis of the differences between IT and AI in companies and the role of AI literacy within the TMT.

The Wealth Habit Ken Okoroafor and Mary Okoroafor, 2026-03-19. The Wealth Habit shows how small, well-designed behaviours repeated consistently create extraordinary financial outcomes over time. Steven Bartlett, *The Diary of a CEO*. Wealth doesn't start with money; it starts with a habit. Most people think that wealth is reserved for the lucky few—those born into privilege, gifted with an entrepreneurial streak, or naturally skilled with money. But the truth is, financial success isn't about luck; it's about habits. The Wealth Habit is a groundbreaking, behaviour-driven approach to wealth building that rewires the way you think about money, turning financial success into a series of tiny, effortless, repeatable actions. Instead of overwhelming readers with rigid budgets or complex investment strategies, this book reveals how small, daily financial moves compound into life-changing wealth, no matter where you start. Whether you're struggling with money, looking to break free from the paycheck-to-paycheck cycle, or searching for a stress-free, automated way to build wealth, this book gives you a clear, habit-based roadmap to make financial success inevitable. Start small. Repeat often. Let the habit lead the way.

Continuing Engineering Education for a Sustainable Future Patricia Caratozzolo, Angeles Dominguez, Bente Nørgaard, Guillermo M. Chans, 2025-08-06. The World Economic Forum stated in its 2023 Future of Jobs report that 44% of workers' skills will change in the next five years. Additionally, six out of ten workers will require training before 2027, and only half will have adequate training opportunities. With this in mind, the three most pressing challenges currently facing the Continuing Engineering Education (CEE) community include:

1. The shifting skill requirements dictated by the job market. Engineering roles in various sectors are evolving, demanding a mix of Knowledge, Skills, and Abilities (KSA) that is difficult to predict with certainty. In addition, the pace of Digital Transformation will highly influence these requirements.
2. The climate change mitigation and adaptation. Engineers must reskill and adapt to
