Risk Modeling for Appraising Named Peril Index Insurance Products Shadreck Mapfumo, Huybert Groenendaal, Chloe Dugger, 2017-04-13

Named peril index insurance has great potential to address unmet risk management needs for agricultural insurance in developing economies potentially contributing to increased agricultural sustainability and improved food security However the development and appraisal of index insurance business lines is not without challenges Insurers must rigorously evaluate the quality of the products they offer and take care to ensure that distributors and policyholders understand the benefits and limits of the purchased coverage Without these important steps to ensure responsible insurance practices insurers can damage the implementation and potential of index insurance in the market Risk Modeling for Appraising Named Peril Index Insurance Products A Guide for Practitioners helps stakeholders in the named peril index insurance industry appraise new and existing products Part 1 of the guide provides a summary of the insights and decisions required for the insurer to make an informed decision to launch and expand an index insurance business line Insurance managers are the primary audience for part 1 Part 2 provides a step by step guide to calculating the decision metrics used by the insurance manager in part 1

These metrics are calculated using probabilistic modeling that provides insights into risks related to the index insurance product. Actuarial analysts are the primary audience for part 2. In an increasingly competitive insurance market, creative product development and imaginative business strategies are becoming the norm. This guide will help emerging market insurers who seek to stay on the cutting edge to successfully and sustainably penetrate new market segments.

Statistics, Data Analysis, and Decision Modeling James Robert Evans, David Louis Olson, 2003. This book covers basic concepts of business statistics, data analysis, and management science in a spreadsheet environment. Practical applications are emphasized throughout the book for business decision making. A comprehensive database is developed with marketing, financial, and production data already formatted on Excel worksheets. This shows how real data is used and decisions are made using Excel as the basic software and including such add-ins as PHStat2, Crystal Ball, and TreePlan. This book covers a wide variety of topics related to business statistics: statistical thinking in business, displaying and summarizing data, random variables, sampling, regression analysis, forecasting, statistical quality control, risk analysis, and Monte Carlo simulation systems, simulation modeling and analysis, selection models, and decision analysis, optimization modeling and solving, and analyzing optimization models. For those employed in the fields of quality control, management science, operations management, statistical science, and those who need to interpret data to make informed business decisions.

Introduction to Management Science Bernard W. Taylor (III), 1999. **Selected Material from Spreadsheet Modeling and Decision Analysis** Cliff T. Ragsdale, 2000. **Props+** E. R. Petersen, 1994. **Managerial Decision Modeling**, 2002. **Quantitative Decision Making with Spreadsheet Applications** Lawrence L. Lapin, William D. Whisler, 2002. Written for students with a background in algebra, this text provides a complete and modern treatment of basic management science methodology. The authors survey the variety and power of management science tools, working to alleviate students' apprehension about the subject and to enable students to recognize on the job situations in which management science methodology can be successfully employed. Emphasizing modeling skills for students of varying mathematical backgrounds, the authors explain how to use Microsoft Excel spreadsheets to build skills as they work through problems. In general, problems are broken into several parts to make difficult concepts easy for students to learn. This book's modular structure affords instructors maximum flexibility. This text contains a special student version of Palisade Corporation's DecisionTools Suite containing Risk, PrecisionTree, BestFit, TopRank, and RiskView. This software is expressly provided for student use and requires student authorization to unlock the software for its full one-year license. Professional customers may use the software for 30 days at which point they must contact Palisade Corporation for a professional version should they wish to continue using the software.
