College Rankings Today

College Rankings Today:

The Alumni Factor The Alumni Factor, 2013-09-10 This book began with a simple premise that there is a better way to assess and rank colleges and universities in America than those currently being offered The primary outcomes of most of today's rankings are 1 To provide readers a view of what life is like as an undergraduate and 2 To give insight into who comes into the college The Alumni Factor on the other hand is more interested in who comes out The aim of this guide is to describe how well a college or university actually develops and shapes its students and what becomes of them after they graduate The Alumni Factor is interested in the actual outcomes experienced by college graduates and the role their college played in creating those outcomes The Alumni Factor believes this information regarding graduate outcomes is truly essential to understanding and assessing our colleges and universities today In line with these goals The Alumni Factor provides a detailed in depth profile of graduates from 225 of our nation's top colleges The profiles were constructed almost entirely with data and insights from the actual college alumni themselves Readers will find The Alumni Factor to be a fascinating look at the incredibly diverse academic social and cultural choices available to capable students today

College Rankings Luke Myers,Jonathan Robe,2009 Today college quality rankings in news magazines and guidebooks are a big business with tangible impacts on the operation of higher education institutions The college rankings published annually by U S News and World Report U S News are so influential that Don Hossler of Indiana University derisively claims that higher education is the victim of management by the magazine How did academic quality rankings of colleges and universities become so powerful in higher education A review of their historical development in the first section of this study may surprise many readers While college professors and administrators alike largely decry rankings today their origin lies in academia itself Begun as esoteric studies by lone professors college rankings development into the most popularly accepted assessment of academic quality was fueled by the very institutions of higher education they now judge While the purpose and design of academic quality rankings has evolved during the century since their creation their history teaches one clear lesson college rankings fill a strong consumer demand for information about institutional quality and as such are here to stay for the foreseeable future Various approaches to college rankings have different benefits and each is subject to legitimate criticism all of which should be seriously considered in light of the powerful effects that a widely distributed ranking can have on institutions of higher education and the students

seeking to enter them Sections II and III will explore these aspects of college rankings respectively In light of the historical lessons revealed in Section I however movements that seek to reform college rankings should be focused on producing better rankings rather than on trying to eliminate or ignore them Section IV will survey multiple new indicators of academic quality that many view as potential improvements over the indicators upon which current college rankings are based Contains 2 figures 6 tables and 116 endnotes

Breaking Ranks Colin Diver, 2022-04-12 Some colleges will do anything to improve their national ranking That can be bad for their students and for higher education Since U S News World Report first published a college ranking in 1983 the rankings industry has become a self appointed judge declaring winners and losers among America s colleges and universities In this revealing account Colin Diver shows how popular rankings have induced college applicants to focus solely on pedigree and prestige while tempting educators to sacrifice academic integrity for short term competitive advantage By forcing colleges into standardized best college hierarchies he argues rankings have threatened the institutional diversity intellectual rigor and social mobility that is the genius of American higher education As a former university administrator who refused to play the game Diver leads his readers on an engaging journey through the mysteries of college rankings admissions financial aid spending policies and academic practices He explains how most dominant college rankings perpetuate views of higher education as a purely consumer good susceptible to unidimensional measures of brand value and prestige Many rankings he asserts also undermine the moral authority of higher education by encouraging various forms of distorted behavior misrepresentation and outright cheating by ranked institutions The recent Varsity Blues admissions scandal for example happened in part because affluent parents wanted to get their children into elite schools by any means necessary Explaining what is most useful and important in evaluating colleges Diver offers both college applicants and educators a guide to pursuing their highest academic goals freed from the siren song of the best college illusion Ultimately he reveals how to break ranks with a rankings industry that misleads its consumers undermines academic values and perpetuates social inequality
