*Applied Computer Science for GGOS Observatories* Alexander N.J. Neidhardt, 2017-08-08 This book combines elementary theory from computer science with real world challenges in global geodetic observation based on examples from the Geodetic Observatory Wettzell Germany It starts with a step by step introduction to developing stable and safe scientific software to run successful software projects The use of software toolboxes is another essential aspect that leads to the application of generative programming An example is a generative network middleware that simplifies communication One of the book s main focuses is on explaining a potential strategy involving autonomous production cells for space geodetic techniques The complete software design of a satellite laser ranging system is taken as an example Such automated systems are then combined for global interaction using secure communication tunnels for remote access The network of radio telescopes is used as a reference Combined observatories form coordinated multi agent systems and offer solutions for operational aspects of the Global Geodetic Observing System GGOS with regard to Industry 4 0

**101 Great Science Experiments** Neil Ardley, 2015-01-16 Forget about mad scientists and messy laboratories This incredible interactive guide for children showcases 101 absolutely awesome experiments you can do at home Find out how to make a rainbow build a buzzer see sound construct a circuit bend light play with shadows measure the wind weigh air and create an underwater volcano The astonishing variety of experiments are all very easy and entirely safe with step by step text and everyday ingredients Biology chemistry and physics are brought to life showing budding young scientists that science is all around us all the time As you have fun trying out experiments with friends and family core scientific principles are presented in the most memorable way With chapters covering important topics such as color magnets light senses electricity and motion the laws of science are introduced in crystal clear text alongside specially commissioned full color photography for children to understand Follow in the footsteps of Albert Einstein Marie Curie and all the other great minds with 101 Great Science Experiments and learn the secrets of science you ll never forget
