stakeholder management product strategy and roadmap creation followed by deeper dives into execution measurement and resilience Later chapters explore the future trajectory of infrastructure and AI product management and culminate in the call to become transformational leaders Who Should Read This Book This book is written for anyone who operates at the crossroads of technology and leadership Aspiring TPMs will find it a roadmap into the profession Experienced product leaders will discover frameworks to refine their practice and expand their influence Engineers considering a transition into product management will gain insight into how to leverage their technical strengths in leadership roles Finally executives and organizational leaders will benefit from understanding the vital yet often overlooked role that TPMs play in bridging vision and execution
