TO Geraldine Wilson, Faze

Re: AI engineer role

Dear Ms. Wilson,

Having heard about the AI engineer role from your CEO Harry Lambert, I feel that my mix of academic and industry expertise would be ideal for your stage of development.

After my Ph.D. in Artificial Intelligence from Oxford University, I embarked on a rewarding journey with the CellTech startup, where I led and contributed to AI-driven initiatives that drove spectacular outcomes. My contributions there included:

- Architecting a predictive analytics model that increased product recommendation accuracy by 342%, directly influencing a 25% growth in quarterly sales.
- Pioneering the implementation of a neural network-based solution for natural language processing, streamlining our customer support chatbot's efficiency, and reducing human intervention by 80%.
- Collaborating with a cross-disciplinary team to develop an AI-driven anomaly detection system for our infrastructure, resulting in a 20% decrease in downtime.

My proficiency encompasses a wide range of tools and platforms, such as TensorFlow and Keras, as well as expertise in deploying models at scale. I've also played an active role in transitioning traditional software systems to AI-enhanced systems, ensuring not only better performance but also scalability.

I have authored research papers that have been featured in AI conferences like NeurIPS and ICML, reflecting my commitment to both the practical and theoretical dimensions of the field. My recent paper on "Distributed Deep Learning Optimization Techniques" emphasizes my commitment to both the applied and research aspects of AI.

Your reputation for harnessing AI to create disruptive solutions and redefine industry standards precedes you. I would be honored to explore any potential opportunities during an interview.

Sincerely,

Cara Powell
