OpenAI Gerard Blokdyk, 2017-11-21. Which individuals, teams or departments will be involved in OpenAI? If substitutes have been appointed, have they been briefed on the OpenAI goals and received regular communications as to the progress to date? How can the value of OpenAI be defined? What is our formula for success in OpenAI? What is the total cost related to deploying OpenAI, including any consulting or professional services? Defining, designing, creating and implementing a process to solve a business challenge or meet a business objective is the most valuable role in EVERY company, organization and department. Unless you are talking about a one-time single use project within a business, there should be a process. Whether that process is managed and implemented by humans, AI, or a combination of the two, it needs to be designed by someone with a complex enough perspective to ask the right questions. Someone capable of asking the right questions and step back and say, "What are we really trying to accomplish here? And is there a different way to look at it?" This Self Assessment empowers people to do just that, whether their title is entrepreneur, manager, consultant, Vice President, CxO, etc. They are the people who rule the future. They are the person who asks the right questions to make OpenAI investments work better. This OpenAI All Inclusive Self Assessment enables you to be that person. All the tools you need for an in-depth OpenAI Self Assessment. Featuring 700 new and updated case-based questions organized into seven core areas of process design, this Self Assessment will help you identify areas in which OpenAI improvements can be made. In using the questions, you will be better able to diagnose OpenAI projects, initiatives, organizations, businesses, and processes using accepted diagnostic standards and practices, implement evidence-based best practice strategies aligned with overall goals, integrate recent advances in OpenAI and process design strategies into practice according to best practice guidelines.
