West to East: A New Global Economy in the Making? Arno J. van Niekerk,2025-09-19 This book covers new trends in the global economy as a result of geopolitical shifts Given the rise of the East especially China and India and strong Arab economies in the Middle East clear signs are emerging that the axis of power may be shifting from the West America and Europe to the East This shift including any intentions towards de dollarization plus its implications need to be thoroughly investigated In addition the influence of the digital revolution in finance cryptocurrencies CBDCs FinTech etc are changing the global landscape What also cannot be overlooked are the disruptive effects caused by the new Trump administration in the United States on the global economy A key question is what are the implications of these significant global developments for economic sustainability Are researchers and policymakers seeing a new form of capitalism emerging or is it new socialism Achieving the Sustainable Development Goals SDGs remain a high priority to most countries around the world but the progress of many has been derailed by the COVID 19 pandemic If economic inclusion as part of the SDGs remains a central objective these

latest developments will have a significant impact on it going forward especially in view of growing geopolitical tension The role of global economic institutions will be crucial in furthering globalization or preventing de globalization A higher level of international collaboration especially from an inclusive economic perspective will be needed to steer the global economy in a direction that will result in genuine economic progress for all Addressing all these aspects the book specifically includes the following special features comparative trends graphs and tables of the geopolitical and geoeconomic shifts over the past few decades illustrations of changes in the financial system new analyses of traditional economic theories e g capitalism and socialism criteria for an inclusive economy and how they help to attain the SDGs new dissections of the digital revolution in the context of the geopolitical shifts and proposals on how to deal with the challenges from a global economic governance perspective Sustainable economic progress is paramount but the challenge of balancing global priorities geopolitical forces and inclusive innovation requires comprehensive investigation In a world where power is fluctuating technologies are transforming the economy and global norms are being rewritten this book offers timely insights into how inclusive and sustainable economic futures can still be imagined and realized

Artificial Intelligence and Large Language Models Abbas Moallem, Helmut Degen, Stavroula Ntoa, 2026-03-11 With the latest developments in generative artificial intelligence AI and large language model LLM applications like ChatGPT and Gemini millions of people have started using them in their personal and professional lives Interest in them continues to grow and they are becoming the go to applications for students academics engineers lawyers designers writers media experts programmers politicians artists and citizens across the globe However understanding these applications can be technical with precious little advice out there This book cuts through the jargon to explain the what why and how of generative AI and LLM applications This book summarizes experiences from a variety of applications relevant to our daily lives It brings together scientifically grounded experience reports from different perspectives into a one stop title With an international outlook and featuring global case studies it offers insights into the beneficial use of LLMs and generative AI including future trends for how the journey of using such amazing tools will continue in the future This book details the history of AI reviews LLM literature and covers neural computing and the technical foundation of LLMs Furthermore the use and control of LLMs in education are covered Through reading this book the reader will develop a full understanding of AI and LLM applications including knowledge of the key issues of trust legality security and technical foundations *Artificial Intelligence and Large Language Models A Scientific Perspective* will appeal to students and academics as well as people interested in the use of LLMs and generative AI for professional or everyday tasks including those in Human Factors Human Computer Interaction Computer Science Software Engineering and Industrial Engineering

Foundations of Deep Reinforcement Learning Laura Graesser, Wah Loon Keng, 2019-11-20 The Contemporary Introduction to Deep Reinforcement Learning that Combines Theory and Practice Deep reinforcement learning deep RL combines deep learning and reinforcement learning in which artificial agents learn to solve sequential

decision making problems In the past decade deep RL has achieved remarkable results on a range of problems from single and multiplayer games such as Go Atari games and DotA 2 to robotics Foundations of Deep Reinforcement Learning is an introduction to deep RL that uniquely combines both theory and implementation It starts with intuition then carefully explains the theory of deep RL algorithms discusses implementations in its companion software library SLM Lab and finishes with the practical details of getting deep RL to work This guide is ideal for both computer science students and software engineers who are familiar with basic machine learning concepts and have a working understanding of Python Understand each key aspect of a deep RL problem Explore policy and value based algorithms including REINFORCE SARSA DQN Double DQN and Prioritized Experience Replay PER Delve into combined algorithms including Actor Critic and Proximal Policy Optimization PPO Understand how algorithms can be parallelized synchronously and asynchronously Run algorithms in SLM Lab and learn the practical implementation details for getting deep RL to work Explore algorithm benchmark results with tuned hyperparameters Understand how deep RL environments are designed Register your book for convenient access to downloads updates and or corrections as they become available See inside book for details

Four Battlegrounds Paul Scharre, 2023-02-28 An NPR 2023 Books We Love Pick One of the Next Big Idea Club's Must Read Books An invaluable primer to arguably the most important driver of change for our future P W Singer author of Burn In An award winning defense expert tells the story of today's great power rivalry the struggle to control artificial intelligence A new industrial revolution has begun Like mechanization or electricity before it artificial intelligence will touch every aspect of our lives and cause profound disruptions in the balance of global power especially among the AI superpowers China the United States and Europe Autonomous weapons expert Paul Scharre takes readers inside the fierce competition to develop and implement this game changing technology and dominate the future Four Battlegrounds argues that four key elements define this struggle data computing power talent and institutions Data is a vital resource like coal or oil but it must be collected and refined Advanced computer chips are the essence of computing power control over chip supply chains grants leverage over rivals Talent is about people which country attracts the best researchers and most advanced technology companies The fourth battlefield is maybe the most critical the ultimate global leader in AI will have institutions that effectively incorporate AI into their economy society and especially their military Scharre's account surges with futuristic technology He explores the ways AI systems are already discovering new strategies via millions of war game simulations developing combat tactics better than any human tracking billions of people using biometrics and subtly controlling information with secret algorithms He visits China's National Team of leading AI companies to show the chilling synergy between China's government private sector and surveillance state He interviews Pentagon leadership and tours U S Defense Department offices in Silicon Valley revealing deep tensions between the military and tech giants who control data chips and talent Yet he concludes that those tensions inherent to our democratic system create resilience and resistance to autocracy in the face of overwhelmingly powerful

technology Engaging and direct Four Battlegrounds offers a vivid picture of how AI is transforming warfare global security and the future of human freedom and what it will take for democracies to remain at the forefront of the world order

Leadership 2.0 in processes of a sustainable change Prof. Dr. Michael Kurwan,2025-06-30 Document from the year 2025 in the subject Leadership and Human Resources Leadership language English abstract In order to successfully implement sustainable changes in a company in the context of change processes strong leadership is required at the top of a company which should have a great deal of empathy and a sure instinct in order to position the company in the market in the long term and profitably In order to successfully shape these sustainable changes it will not be the famous power of the leader of the past but will only work with the involvement of employees in the new world of work in the knowledge age which is characterized by digitalization and artificial intelligence This new form of leadership is also referred to as Leadership 2 0 in which it is important to retain top performers and in particular key personnel in the company in the long term which is a very challenging leadership task in HR management In change processes a fundamental distinction must be made between incremental change management and radical change management While incremental change takes place continuously and is integrated into everyday working life radical change represents a strategic realignment of the company which is largely associated with staff reductions and is intended to change the corporate culture This is particularly true in the case of restructuring where cost cutting programs play a decisive role in ensuring the long term survival of the company Employees are more willing to go along with incremental change also known as continuous improvement than radical change as they could also be affected by staff cuts This fuels employees fears and therefore often leads to high staff turnover *United States Circuit Courts of Appeals Reports* ,1911 United States of America V.
