Carrano, Paul Helman, Robert Veroff, 1998 Focusing on data abstraction and data structures the second edition of this very successful book continues to emphasize the needs of both the instructor and the student The book illustrates the role of classes and abstract data types ADTs in the problem solving process as the foundation for an object oriented approach Throughout the next the distinction between specification and implementation is continually stressed The text covers major applications of ADTs such as searching a flight map and performing an event driven simulation It also offers early extensive coverage of recursion and uses this technique in many examples and exercises Overall the lucid writing style widespread use of examples and flexible coverage of material have helped make this a leading book in the field Book Jacket Proceedings of the Twenty-sixth SIGCSE Technical Symposium on Computer Science Education Cary Laxer, 1995 **Conference Proceedings. New Perspectives in Science Education** Pixel, 2017 *Subject Guide to Books in Print*, 2001 **Data Structures and the Standard Template Library** William Joseph Collins, 2003 DATA STRUCTURES AND THE STANDARD TEMPLATE LIBRARY by William Collins teaches the fundamentals of Data Structures and their implementations It uses C as the language of instruction Most of the data structures are provided in the Standard Template Library STL which students will be able to use in their further coursework and beyond To further students understanding of implementation issues alternative implementation other than the STL are also discussed Hands on learning is promoted throughout the text by the use of Programming Projects and labs Programming projects at the end of each chapter allow students to develop and

implement their own data structures or to extend or apply data structures introduced in the chapter. Additionally, optional labs accompany the text and allow students to practice by giving them opportunities to code. These labs can be used in many different ways such as in a closed lab, in an open lab, or for optional homework assignments.

Publisher description

Data Abstraction and Problem Solving with Java Frank M. Carrano, Janet J. Prichard, 2006. The second edition in Java of the classic Walls and Mirrors approach to programming designs solutions to problems using both data abstraction, the walls, and recursion. The Mirrors Data Abstraction and Problem Solving with Java Walls and Mirrors 2 provides a focus on the important concepts of data abstraction and data structures in a way that beginning programmers find accessible. The first part of the book covers problem solving techniques including a review of Java fundamentals, principles of programming, and software engineering recursion and data abstraction and linked lists. Later chapters focus on problem solving with abstract data types including stacks, queues, algorithm efficiency, and sorting trees and graphs. This edition contains enhanced material on OO implementation. MARKET Readers searching for problem solving solutions through abstraction, algorithmic refinement, data structures, and recursion.

Data Abstraction & Problem Solving with C++ Frank M. Carrano, 2007. The classic best-selling Data Abstraction and Problem Solving with C Walls and Mirrors book provides a firm foundation in data abstraction that emphasizes the distinction between specifications and implementation as the basis for an object-oriented approach. This new edition offers the latest C features and an introduction to using Doxygen, a documentation generator for C, enhanced coverage of Software Engineering concepts, and additional UML diagrams.

Data Abstraction and Problem Solving with C++ Frank M. Carrano, Janet J. Prichard, 2005. Designed for a second course in computer science, this textbook introduces the data abstraction technique for building walls between a program and its data structures and presents various abstract data types and their implementations as C classes. The author evaluates the advantages and disadvantages of array-based and pointer-based data structures and explains the concepts behind recursion, inheritance, polymorphism, algorithm efficiency, and balanced search trees.
