**Learn D3.js** Helder da Rocha,2019-05-03 Explore the power of D3 js 5 and its integration with web technologies for building rich and interactive data visualization solutions Key FeaturesExplore the latest D3 js 5 for creating charts plots and force directed graphicsPractical guide for creating interactive graphics and data driven apps with JavaScriptBuild Real time visualization and transition on web using SVG with D3 jsBook Description This book is a practical hands on introduction to D3 Data driven Documents the most popular open source JavaScript library for creating interactive web based data visualizations Based entirely on open web standards D3 provides an integrated collection of tools for efficiently binding data to graphical elements If you have basic knowledge of HTML CSS and JavaScript you can use D3 js to create beautiful interactive web based data visualizations D3 is not a charting library It doesn't contain any pre defined chart types but can be used to create whatever visual representations of data you can imagine The goal of this book is to introduce D3 and provide a learning path so that you obtain a solid understanding of its fundamental concepts learn to use most of its modules and functions and gain enough experience to create your own D3 visualizations You will learn how to create bar line pie and scatter charts trees dendograms treemaps circle packs chord ribbon diagrams sankey diagrams animated network diagrams and maps using different geographical projections Fundamental concepts are explained in each chapter and then applied to a larger example in step by step tutorials complete with full code from hundreds of examples you can download and run This book covers D3 version 5 and is based on ES2015 JavaScript What you will learnLearn to use D3 js version 5 and web standards to create beautiful interactive data driven visualizations for the webBind data to DOM elements applying different scales color schemes and configuring smooth animated transitions for data updatesGenerate data structures and layouts for many popular chart formats Apply interactive behaviors to any chartCreate thematic maps based on GIS data using different geographical projections with interactive behaviors Load parse and transform data from JSON and CSV formatsWho this book is for The book is intended for web developers web designers data scientists artists and any developer who wish to create interactive data visualization for the Web using D3 The book assumes basic knowledge of HTML CSs and JavaScript

*Practical D3.js* Tarek Amr,Rayna Stamboliyska,2016-07-04 Your indispensable guide to mastering the efficient use of D3 js in professional standard data visualization projects You will learn what data visualization is how to work with it and how to think like a D3 js expert both practically and theoretically Practical D3 js does not just show you how to use D3 js it teaches you how to think like a data scientist and work with the data in the real world In Part One you will learn about theories behind data visualization In Part Two you will learn how to use D3 js to

create the best charts and layouts Uniquely this book intertwines the technical details of D3 js with practical topics such as data journalism and the use of open government data Written by leading data scientists Tarek Amr and Rayna Stamboliyska this book is your guide to using D3 js in the real world add it to your library today You Will Learn How to think like a data scientist and present data in the best way What structure and design strategies you can use for compelling data visualization How to use data binding animations and events scales and color pickers How to use shapes path generators arcs and polygons Who This Book is For This book is for anyone who wants to learn to master the use of D3 js in a practical manner while still learning the important theoretical aspects needed to enable them to work with their data in the best possible way

*Pro D3.js* Marcos Iglesias,2019-10-31 Go beyond the basics of D3 js to create maintainable modular and testable charts and to package them into a library that can be distributed as open source software or kept for private use This book will show you how to transform regular D3 js chart code into reusable and extendable modules You know the basics of working with D3 js but it s time to become a professional D3 js practitioner This book is your launching pad to refactoring code composing complex visualizations from small components working as a team with other developers and integrating charts with a Continuous Integration system You ll begin by creating a production ready chart using D3 js v5 ES2015 and a test driven approach and then move on to using and extending Britecharts the reusable charting library based on Reusable API patterns Finally you ll see how to use D3 js along with React to document and build your charts to compose a charting library you can release into the NPM repository With *Pro D3.js* you ll become an accomplished D3 js developer in no time What You Will Learn Create v5 D3 js charts with ES2016 and unit tests Develop modular testable and extensible code with the Reusable API pattern Work with and extend Britecharts a reusable charting library created at Eventbrite Use Webpack and npm to create and publish a charting library from your own chart collections Write reference documentation and build a documentation homepage for your library Who This Book Is For Data scientists data visualization engineers and frontend developers with a fundamental knowledge of D3 js and some experience with JavaScript as well as data journalists and consultants **IPython**

**Interactive Computing and Visualization Cookbook** Cyrille Rossant,2018-01-31 Learn to use IPython and Jupyter Notebook for your data analysis and visualization work Key Features Leverage the Jupyter Notebook for interactive data science and visualization Become an expert in high performance computing and visualization for data analysis and scientific modeling A comprehensive coverage of scientific computing through many hands on example driven recipes with detailed step by step explanations Book Description Python is one of the leading open source platforms for data science and numerical computing IPython and the associated Jupyter Notebook offer efficient interfaces to Python for data analysis and interactive visualization and they constitute an ideal gateway to the platform IPython Interactive Computing and Visualization Cookbook Second Edition contains many ready to use focused recipes for high performance scientific computing and data analysis from the latest IPython Jupyter features to the most advanced tricks to help you write better and faster code You will apply these

state of the art methods to various real world examples illustrating topics in applied mathematics scientific modeling and machine learning The first part of the book covers programming techniques code quality and reproducibility code optimization high performance computing through just in time compilation parallel computing and graphics card programming The second part tackles data science statistics machine learning signal and image processing dynamical systems and pure and applied mathematics What you will learn Master all features of the Jupyter Notebook Code better write high quality readable and well tested programs profile and optimize your code and conduct reproducible interactive computing experiments Visualize data and create interactive plots in the Jupyter Notebook Write blazingly fast Python programs with NumPy ctypes Numba Cython OpenMP GPU programming CUDA parallel IPython Dask and more Analyze data with Bayesian or frequentist statistics Pandas PyMC and R and learn from actual data through machine learning scikit learn Gain valuable insights into signals images and sounds with SciPy scikit image and OpenCV Simulate deterministic and stochastic dynamical systems in Python Familiarize yourself with math in Python using SymPy and Sage algebra analysis logic graphs geometry and probability theory Who this book is for This book is intended for anyone interested in numerical computing and data science students researchers teachers engineers analysts and hobbyists A basic knowledge of Python NumPy is recommended Some skills in mathematics will help you understand the theory behind the computational methods

hexbin map with D3.js In Detail D3.js is a visualization library used for the creation and control of dynamic and interactive graphical forms. It is a library used to manipulate HTML and SVG documents as well as the Canvas element based on data. Using D3.js developers can create interactive maps for the web that look and feel beautiful. This book will show you how to build and design maps with D3.js and gives you great insight into projections, colors, and the most appropriate types of map. The book begins by helping you set up all the tools necessary to build visualizations and maps. Then it covers obtaining geographic data, modifying it to your specific needs, visualizing it with augmented data using D3.js. It will further show you how to draw and map with the Canvas API and how to publish your visualization. By the end of this book, you'll be creating maps like the election maps and the kind of infographics you'll find on sites like the New York Times. Style and approach: This step-by-step guide with pragmatic examples will help you create maps and amazing visualizations.

Build beautiful data visualizations with D3. The Fullstack D3 book is the complete guide to D3. With dozens of code examples showing each step, you can gain new insights into your data by creating visualizations. Learn how to quickly turn data into insights with D3. We have the data, but it needs to be understood by humans. The best way to convert this data into an understandable format is to mold it into a data visualization. And D3 is the best tool for the job if you need to create custom data visualizations. With Fullstack D3 and Data Visualization, you and your team will be able to share key insights, uncover problems before they start, and impress your boss by creating gorgeous visualizations.

What's Inside

Chapter 0 Introduction When would you want to use D3.js? There is a spectrum of libraries to create charts on the web. On one end, you have easy-to-use basic libraries that will create a standard chart type.

Chapter 1 Making your first chart In this chapter, we make a line chart. Line charts are a great starting place because of their popularity but also because of their simplicity.

Chapter 2 Making a scatterplot When looking at the relationship between two metrics, a scatterplot is a good choice. In this chapter, we show how to create a scatterplot.

Chapter 3 Making a bar chart In this chapter, we cover how to create a histogram, which is a bar chart that shows the distribution of one metric with the metric values on the x-axis and the frequency of values on the y-axis.

Chapter 4 Animations and Transitions When we update our charts, we can animate elements from their old to their new positions. These animations can be visually exciting but more importantly, they have functional benefits.

Chapter 5 Interactions The biggest advantage of creating charts with JavaScript is the ability to respond to user input.

Chapter 6 Making a map Maps are also uniquely good at answering geography-based questions. In this chapter, we'll build a map and learn how to plot values within a location.

Chapter 7 Data Visualization Basics Now that we're comfortable with how to create a chart, we should zoom out a bit and talk about what chart to create.

Chapter 8 Common Charts In this chapter, we talk about common chart types and when to use them.

Chapter 9 Dashboard Design A dashboard is any web interface that makes sense out of dynamic data, and in this chapter, we learn how

to make one Chapter 10 Advanced Visualization Marginal Histogram First we'll focus on enhancing a chart we've already made our scatter plot This chart will have multiple goals all exploring the daily temperature ranges in our weather dataset Chapter 11 Advanced Visualization Radial Weather Chart We talked about radar charts in Chapter 10 For this project we'll build a more complex radar chart Chapter 12 Advanced Visualization Animated Sankey Diagram In this project we'll be simulating real data and creating an animated diagram to engage our viewers Chapter 13 D3 and React What's the best way to draw a chart within React It turns out that there is a fair bit of overlap in functionality between a React and D3 we'll discuss how we can create blazing fast charts using the two together Chapter 14 D3 and Angular In this chapter we show how to create optimized SVG charts using D3 and Angular
