

# Solutions to deforestation

We can limit deforestation and its effects.

## Eat less meat and buy sustainable products

Reducing beef consumption by 20% could halve deforestation in the next 30 years. Purchasing sustainable products also minimizes deforestation.

## Give indigenous people control of forests

Deforestation is more cost-efficient, and rates are 20% lower where Indigenous people are in charge of the land.

## Regulate supply chains for sustainability

40% of tropical deforestation results from the trade of commodities. Making those supply chains sustainable will limit deforestation.

## Sustainable forest management

Following a globally recognized certification standard like FSC helps promote sustainable forest management.

**Handbook of Nature-Based Solutions to Mitigation and Adaptation to Climate Change** Gustavo J. Nagy, Desalegn Yayeh Ayal, 2025-11-04 Over recent years nature based solutions NbS have gained popularity as tools to ameliorate the effects of climate change while slowing down the global warming process More specifically the potential of NbS has been explored in terms of meeting greenhouse gas emissions targets and fostering climate change adaptation NbS are methods that use and enhance nature to improve social and environmental challenges They involve several multifaceted actions that work sustainably to restore and protect the natural environment while helping people Therefore these solutions are useful in climate change adaptation and mitigation There are 3 main areas which NbS may target namely reducing exposure reducing sensitivity and supporting adaptive capacity Reducing exposure refers to protecting areas from existing climate change effects There is thus a perceived need to document and promote experiences related to NbS and to apply these in different contexts It is against this background that the Handbook of Nature Based Solutions to Mitigation and Adaptation to Climate Change is being produced The publication will showcase experiences related to NbS from around the world In particular it will gather examples of projects studies and the latest thinking on NbS which can serve the purpose of inspiring and fostering further works in this key area Thanks to its scope and thematic diversity the book will be of special interest to representatives from government organisations researchers and students from a wide range of natural and social sciences courses It will also provide useful information to practitioners and representatives from non governmental organisations

Essays on Pollution Control in Economics and Management Science Fouad El Ouardighi, 2025-04-25 The book features contributions that address both environmental economics and environmental management It presents a novel dynamic modeling framework for environmental economics in which environmental absorption efficiency is considered as a time dependent variable with its own dynamics It also introduces several extensions and applications of the model including the possibility of including self regenerating environmental absorption efficiency non cooperative transboundary issues with two superimposed free rider behaviors i e emissions reduction and restoration efforts and deforestation In the environmental management context it puts forward an entirely new dynamic modeling framework Unlike static approaches the model considers both flow and stock variables reflecting the accumulation of pollution over time In turn the book assesses sustainable configurations for supply chain competition providing mathematical insights and managerial recommendations that integrate accumulated pollution aspects and associated negative externalities Overall the book calls for combining environmental economics and environmental management in order to arrive at more realistic empirically grounded models Given its focus the book offers a valuable resource for researchers and graduate students with an interest in addressing pollution control challenges in the fields of economics and management science Green Horizons: Unveiling

**Forests, the People, and the Government** Renu Khator, 1989 The welfare role of the state has allowed the bureaucracy to venture into new areas of regulation and consequently to assume a leviathanian role in the modern society But what is the cost of this bureaucratic intervention Is regulation cost effective to the society With these questions as the bases of analysis this book examines the outcome of the forest policy process in India An analysis of the

forest policy indicates that the realization of the deforestation problem occurred as early as in the 1860s since then the government has been relying on the regulatory capabilities of the bureaucracy to control the sources of deforestation Regulations it is argued are necessary to restrict the destructive use of forests by the people especially the forest dwellers Contrary to this argument environmentalists blame the corrupt and selfish behaviour of bureaucrats for the damage done to the forests Despite of an extensive legal network nation continues to lose more than one million hectares of forests each year This book provides an statistical analysis of the causes of deforestation in India states After assessing the influence of several independent variables political economic bureaucratic and demographic on deforestation the study concludes that the bureaucracy indeed has failed in its regulatory role **"Illegal" Logging and Global Wood Markets** ,2004
