Andre Lewis, Cameron Turner, Jeffrey Sambells, Michael Purvis, 2007-05-02 The Google Maps API remains one of the showcase examples of the Web 2.0 development paradigm. Beginning Google Maps Applications with Rails and Ajax From Novice to Professional is the first book to comprehensively introduce the service from a developer perspective showing you how you can integrate mapping features into your Rails driven web applications. Proceeding far beyond simplistic map display you'll learn how to draw from a variety of data sources such as the U.S. Census Bureau's TIGER Line data and Google's own geocoding feature to build comprehensive geocoding services for mapping many locations around the world. The book also steers you through various examples that show how to encourage user interaction such as through pinpointing map locations, adding comments and building community driven maps. You'll want to pick up a copy of this book because this is the first book to comprehensively introduce the Google Maps application development using the Rails development framework. You'll be introduced to the very latest changes to the Google Maps API embodied in the version 2 release. It is written by four developers actively involved in the creation of location based mapping services. For additional info please visit the author's reference site for this book.

**Online Maps with APIs and WebServices** Michael P. Peterson, 2012-03-30 The Internet has become the major form of map delivery. The current presentation of maps is based on the use of online services. This session examines developments related to online methods of map delivery particularly Application Programmer Interfaces (APIs) and MapServices in general including Google Maps API and similar services. Map mashups have had a major impact on how spatial information is presented. The advantage of using a major online mapping site is that the maps represent a common and recognizable representation of the world. Overlaying features on top of these maps provides a frame of reference for the map user. A particular advantage for thematic mapping is the ability to spatially reference thematic data.

73.1 International Perspectives on Maps and the Internet: An Introduction Michael P. Peterson

- 1.1 Introduction The Mosaic browser, the first to support graphics, was introduced in 1993 and at some point during that year the first map was transmitted through the Internet to a web page. Little notice was taken of the first web map but the development of Internet cartography since has been nothing but remarkable. The new medium of communication changed maps from static entities on paper to dynamic products of interaction. Millions of maps are now created by servers every hour and transmitted through the Internet. When we need to find a place or find out about a place we turn immediately to these servers through the Internet. In a few short years the World Wide Web has transformed the Internet into the primary medium for the dissemination of spatial information in the form of maps.
