with many stunning and inspiring photographs taken by their eldest son Asher who was 15 at the time of the trip this travelogue attempts to chronologically record the family's epic 43 state journey around the USA. The whole family contributes many candid thoughts and learning moments being on a daily shifting schedule and of their encounters in a vast country so different from their own. As exciting as any unscripted adventure could go, expect the unexpected. There were many ups and downs in the course of their journey. The Ongs give an insight into some of their Christian guiding principles on how their family of eight co-exist together in loving relationships and how they overcame obstacles and difficulties they encountered. School was everywhere they camped. Education was lived out. America was their textbook and God their Master Teacher.

Design and the Elastic Mind Paola Antonelli, Museum of Modern Art (New York, N.Y.), 2008. In the past few decades individuals have experienced dramatic changes in some of the most established dimensions of human life: time, space, matter, and individuality. Minds today must be able to synthesize such transformations whether they are working across several time zones, travelling between satellite maps and nanoscale images, drowning in information or acting fast in order to preserve some slow downtime. *Design and the Elastic Mind* focuses on designers' ability to grasp momentous advances in technology, science, and social mores and convert them into useful objects and systems. The projects included range from nanodevices to vehicles, appliances to interfaces and building facades, pragmatic solutions for everyday use to provocative ideas meant to influence our future choices. Designed by award-winning book designer Irma Boom, this volume also features essays by Paola Antonelli, design critic and historian; Hugh Aldersey Williams, visualization design expert; Peter Hall and nanophysicist Ted Sargent that further explore the promising relationship between design and science.

Chinese Explored Asia Long Before The Europeans: An Ancient World Map Tells All Sheng-wei Wang, 2025-08-28. *Chinese Explored Asia Long Before the Europeans: An Ancient World Map Tells All* is the fruit of the author's research into the history of exploration prior to the European Age of Discovery. This book analyses thoroughly the Asian regions of an important ancient world map, Kunyu Wanguo Quantu (KWQ), translated as Complete Geographical Map of All the Kingdoms of the World. The map was published in 1602 by Italian Jesuit priest Matteo Ricci in China. For over 400 years the map has been regarded as strictly of European origin and based on maps which Ricci brought with him to China in 1582 during the Ming Dynasty. However, after analysing the histories of all the geographical terms associated with Asia on the KWQ, this book presents multilayer evidence that the Asian regions on this map are of Chinese origin and that they reveal eras long before the arrival of Europeans: Japan in 897, Joseon in 1433, Ming China in 1433, Southeast Asia in 1432, 1433, the Indian Subcontinent and its eastern periphery in 1432, 1433, West and Central Asia in 1433, and Asia to the North of China in 1428, 1433. The present book and the author's previous book titled *Chinese Global Exploration in the Pre-Columbian Era: Evidence from an Ancient World Map* can serve as a foundation for future China studies and offer new insights into the world history of land and maritime exploration.
