Analysis of Innovations in Food Development: Improving Nutritional Value, Flavor and Texture in Food

Products Ivan Luzardo-Ocampo, José M. Alvarez-Suarez, 2026-02-24 The global food industry is undergoing a transformative shift driven by consumer demands for healthier, more sustainable and tastier food options. Innovation in food development is crucial to address these evolving needs while also tackling challenges like food security, nutritional deficiencies, and the environmental impact of food production. By investigating novel ingredients, processing techniques, and formulation strategies, we seek to uncover how the food industry can create products that not only meet nutritional guidelines but also deliver exceptional sensory experiences. This includes research on plant-based alternatives, functional foods, reformulation of existing and novel products, exotic foods, and the application of emerging technologies like 3D printing and precision fermentation. This research topic aims to explore the latest advancements in food science and technology aimed at enhancing the nutritional value, flavor, and texture of various food products. By collecting research dedicated to these questions, we seek to increase evidence on these aspects throughout the continuous process of innovation in the food industry. In line with this innovative approach in the food industry, in this research topic, we welcome especially original contributions from researchers, food scientists, nutritionists, and industry professionals to share their insights on topics such as: Development and application of novel ingredients with enhanced nutritional profiles or functional properties; Applications of native or underutilized products and ingredients as novel food prototypes with outstanding nutritional and textural value; Innovative processing methods that preserve or enhance nutrients, flavor, and texture; Strategies for reformulating existing products to improve their nutritional value without compromising taste or texture; Exploration of the role of emerging technologies in creating healthier and more appealing food options; Consumer perception and acceptance of innovative food products; The impact of food innovations on sustainability and food security. This Research Topic will provide a comprehensive overview of the current state of innovation in food development, highlighting the potential for creating a more nutritious, delicious, and sustainable food system. [Nutraceutical Fruits and Foods for Neurodegenerative Disorders](#) Raj K. Keservani, Rajesh K.

Kesharwani, Mila Emerald, Anil K. Sharma, 2023-11-21 Nutraceutical Fruits and Foods for Neurodegenerative Disorders presents food-based strategies specifically related to nutraceuticals in delaying the onset and slowing down of the propensity of neuronal devastation.
