*English Language Teaching Research in the Middle East and North Africa* Sahbi Hidri, 2018-11-23 This edited collection examines a range of English Language Teaching (ELT) research in the Middle East and North Africa (MENA). While the MENA context has witnessed considerable change in recent years, it has so far been under-represented in ELT research at both the regional and the international level. This book aims to fill that gap by surveying the current state of the field, examining in detail a range of issues and concepts, and suggesting future directions for further research. It will be of interest to ELT researchers and practitioners in general, not just those based in MENA contexts themselves.

*Identification of Disability and Assessment of Needs: Special Education* Mr. Sailash Kumar, Mr. Krishan Lal, 2025-07-22 The book provides an in-depth exploration of intellectual disability (ID), its assessment, and the needs of individuals with ID at various stages of life, with a strong focus on inclusion. In the first chapter, 'Intellectual Disability: Nature and Needs', the historic perspective of intellectual disability is examined, highlighting the evolving understanding of ID over time. Definitions from various national and international bodies, such as the WHO and the Rights of Persons with Disabilities Act (RPwD) 2016, are presented, laying a foundation for a global understanding of ID. The chapter further delves into the causes, prevention strategies, and classifications of intellectual disability, offering a comprehensive view of the medical, psychological, and educational classifications. Screening, identification, and the specific needs of individuals with ID are also discussed to provide a clear picture of how individuals with ID are recognized and understood within different frameworks. In subsequent chapters, the book delves into the assessment process, starting with a general understanding of assessment in Chapter 2, which covers its purpose, methods, and types, including Norm-Referenced Tests (NRT) and Criterion-Referenced Tests (CRT). The book highlights the importance of assessment across medical, psychological, and educational domains, focusing on tools such as the Binet test, WISC, and Indian adaptations. The significance of assessment for educational programming, certification, and the implications of assessment outcomes for inclusion is thoroughly explored. Chapters 3 and 4 extend the discussion of assessment to the school, adult, and vocational levels. The role of assessment in the development of individuals with intellectual disabilities in educational settings is critically analyzed, emphasizing tools and strategies for both early childhood and school-aged children. Furthermore, the book addresses the transition from school to independent living, vocational training, and the importance of assessment in fostering independence and community living for adults with ID. Finally, the book explores the significance of assessing family needs in Chapter 5, considering how family dynamics, including parental and sibling needs, impact the educational and developmental planning for individuals with intellectual disabilities. This comprehensive exploration of intellectual disability and assessment provides valuable insights into the multifaceted nature of ID, emphasizing the role of inclusive education and community-based approaches in supporting individuals with disabilities.
