can be made of various materials surfaces and achieves different design effects It shows the conditions under which certain constructions can be employed and why what criteria such as construction costs issues of sustainability of energy efficiency of assembly or of insulation or protection against moisture can also influence the choice of a system In addition to classical constructions Enclose Build offers a look at future developments How will the facade evolve as an interface for information What do viable concepts for environmentally active energy efficient building shells look like Enclose Build is an indispensable tool for every architect and planner
