Breaking Ranks Colin Diver, 2022-04-12 Some colleges will do anything to improve their national ranking That can be bad for their students and for higher education Since U S News World Report first published a college ranking in 1983 the rankings industry has become a self appointed judge declaring winners and losers among America's colleges and universities In this revealing account Colin Diver shows how popular rankings have induced college applicants to focus solely on pedigree and prestige while tempting educators to sacrifice academic integrity for short term competitive advantage By forcing colleges into standardized best college hierarchies he argues rankings have threatened the institutional diversity intellectual rigor and social mobility that is the genius of American higher education As a former university administrator who refused to play the game Diver leads his readers on an engaging journey through the mysteries of college rankings admissions financial aid spending policies and academic practices He explains how most dominant college rankings perpetuate views of higher education as a purely consumer good susceptible to unidimensional measures of brand value and prestige Many rankings he asserts also undermine the moral authority of higher education by encouraging various forms of distorted behavior misrepresentation and outright cheating by ranked institutions The recent Varsity Blues admissions scandal for example happened in part because affluent parents wanted to get their children into elite schools by any means necessary Explaining what is most useful and important in evaluating colleges Diver offers both college applicants and educators a guide to pursuing their highest academic goals freed from the siren song of the best college illusion Ultimately he reveals how to break ranks with a rankings industry that misleads its consumers undermines academic values and perpetuates social inequality

Evaluating and Responding to College Guidebooks and Rankings R. Dan Walleri, Marsha K. Moss, 1995-12-27 The proliferation of

college guidebooks and reputational rankings has become of increasing concern to many in the higher education community. Public relations and admissions staff view such publications from a marketing perspective and the potential positive or negative consequences for enrollment. College presidents share these concerns along with the broader implications for the overall stature of their institutions. The validity and integrity of the information reported is of particular interest to those who work in the area of institutional research. Acknowledging the fact that the public, the consumers, has a great need for information about different institutions in order to make informed college choices for themselves or their children, all of these groups in higher education share alarm about the burden imposed on institutions in responding to the ever increasing number of publishers requesting information for these guidebooks and rankings. This volume explores some of the major facets of and issues surrounding college guidebooks and ratings. The background and development of these publications are traced followed by discussion of major issues and perspectives: consumer use of the publications, validity of ratings and the institutional burden of supplying the needed information. Views from both the institutions and the publishers are presented. This is the 88th issue of the quarterly journal *New Directions for Institutional Research*. Between Mission and Market Daniel Rosenberg, 2017-04-26 *Between Mission and Market: The Freshman Year in a Corporate Age* focuses on the arrival of college freshmen at the moment of the transformation. It uses Adelphi University in suburban New York City to study an attempt to resolve first year difficulties. As higher education institutions turn into enterprises run on business models, the pressures of getting into college, including the taking of the SAT and ACT, have induced stress, addictions, eating disorders, drug use and mental problems. However, special programs to ease the first year transition through counseling and support are run as cheaply as possible. This book confronts some of the cardinal controversies in higher education, particularly those affecting first year students: high stakes testing in general, particularly the SAT, the intensification of student debt and the financial sentence imposed upon all who incur it, and the dramatic pressures placed upon freshmen as they transition to college.

University Rankings, Diversity, and the New Landscape of Higher Education, 2019-02-18 University rankings are a relatively new phenomenon in higher education. Although quite an established practice in the U.S., it is only within the last decade that attempts to analyse university performance have spread to the rest of the world and that we also have seen new global rankings appear, rankings attempting to measure university performance beyond national borders. No wonder that this trend is accompanied by a growing interest in studying rankings throughout the world. This book is written as part of the effort to better understand rankings and their effects on higher education. A serious approach towards university rankings implies that rankings should be analysed properly, including the methods used and the

indicators chosen and investigate the objectives claimed If university rankings are considered as consumer information then everyone should have an interest in basing such guidance on valid and reliable data and methodology A serious analysis should also discuss the wider implications of rankings as an emerging phenomenon in higher education Consequently the contributions to this book investigate and analyse how different rankings work how they reach their conclusions and on what data and methodology they are built Furthermore it provides a critical reflection about the impact of rankings on higher education how and in what way rankings influence policy making the structure of the sector or the internal life of the sector

College Rankings Luke Myers,Jonathan Robe,2009 Today college quality rankings in news magazines and guidebooks are a big business with tangible impacts on the operation of higher education institutions The college rankings published annually by U S News and World Report U S News are so influential that Don Hossler of Indiana University derisively claims that higher education is the victim of management by the magazine How did academic quality rankings of colleges and universities become so powerful in higher education A review of their historical development in the first section of this study may surprise many readers While college professors and administrators alike largely decry rankings today their origin lies in academia itself Begun as esoteric studies by lone professors college rankings development into the most popularly accepted assessment of academic quality was fueled by the very institutions of higher education they now judge While the purpose and design of academic quality rankings has evolved during the century since their creation their history teaches one clear lesson college rankings fill a strong consumer demand for information about institutional quality and as such are here to stay for the foreseeable future Various approaches to college rankings have different benefits and each is subject to legitimate criticism all of which should be seriously considered in light of the powerful effects that a widely distributed ranking can have on institutions of higher education and the students seeking to enter them Sections II and III will explore these aspects of college rankings respectively In light of the historical lessons revealed in Section I however movements that seek to reform college rankings should be focused on producing better rankings rather than on trying to eliminate or ignore them Section IV will survey multiple new indicators of academic quality that many view as potential improvements over the indicators upon which current college rankings are based Contains 2 figures 6 tables and 116 endnotes **U.S. News and World Report**
