*Stress & Anxiety Relief* Samar Ghadban, 2016-06-28 Anxiety is a common human experience which is a form of fear of so many things like bankruptcy work or sickness These tensions don t only affect the mind but they affect the body too because body and mind are not two separate entities they communicate together as one entity and when the mind becomes tensed the body directly becomes tensed too When we are anxious or get worried the energy of the anxiety can be channeled into action where it becomes a problem and when it happens for no obvious reason it make us afraid but we don t know what to do to restore a sense of safety Therefore when feeling anxious without a clear reason all we can do is to worry The anxiety is telling us that something is wrong and we d better do something about it but we don t know what s wrong or what to do our minds get caught up in worry and the worry makes the anxiety worse Before we know it we re in the anxiety worry spiral Anxiety and worry feed each other To complicate things even more we become anxious about being anxious We try to push the anxiety out or run away from it and that makes it even worse Add to mention there are two kinds of tension the body tensions and the mind tensions Both have to be released before you can start relaxation which will bring you to awareness Through this book you will learn about awareness and relaxation which are two sides of the same coin and you can t separate them Thus awareness takes you away from the mind and the identifications of the mind and naturally the body starts relaxing for you

are no longer attached and tensions which can't exist in the light of awareness. This book reveals facts about stress and how it starts in the mind first then the body follows where it also explains about certain techniques used for relaxation: breathings, yoga, food for relaxation. In addition to meditation which requires no energy for meditation is passive and silent. But anger, thinking, and violence all need energy.

*The Anxiety Getaway* Craig April, 2020-06-16. Learn how to overcome fear and relieve your anxiety through cognitive behavioral therapy. Many of the available resources for managing anxiety are based on opinion rather than science. Dr. Craig April, founder of The April Center for Anxiety Attack Management, relies on the latter. By employing Cognitive Behavioral Therapy (CBT), he helps readers overcome fear for the anxiety relief they desire. Assuming the role of victim when it comes to anxiety can make us feel trapped and convince us that we have no control in getting better. However, Dr. April has found that in most of its forms, anxiety is not a mental health disorder. In fact, anxiety relief begins by facing our fears. Using a stripped-down, no-nonsense approach to anxiety, Dr. April takes CBT techniques and tackles anxiety at the root: false fear messages. Fear is a factor in all lives, whether we feel it plays a significant role in controlling us or not. Lucky for us, it is also something that can be faced. By recognizing anxiety as a result of false fear messages, we become better equipped to manage it. An expert in Cognitive Behavioral Therapy for anxiety relief, Dr. April uses over twenty years of experience to help readers face their fears and overcome their anxiety. In this indispensable book on anxiety relief for adults, you'll discover effective anti-anxiety methods used at The April Center for Anxiety Attack Management: A non-victim approach to help you take back
