gap between IT and the business The approach presented in this story lines up to the six IMPACT pillars of the DataOps model that Kinaesis [www.kinaesis.com](http://www.kinaesis.com) has been using through its consultants to deliver successful projects and turn around failing deliveries The pillars help to organise thinking and structure an approach to project delivery The pillars are broken down and translated into steps that can be applied to real world projects that can deliver satisfaction and fulfillment to customers and project team members
