## What Is a Galaxy?

Read the passage and answer the questions.

A galaxy is a massive system of stars, stellar remnants, interstellar gas and dust, and dark matter all bound together by gravity. Galaxies come in various shapes and sizes and the most common form is being spiral, elliptical, and irregular. Galaxies that contain billions of stars are called dwarf galaxies, while galaxies with billions of billions of stars are called giant galaxies, and some are called supergalaxies.

The Milky Way is one galaxy that contains our solar system and is classified as a barred spiral galaxy. It is estimated to have over 100 billion stars and spans about 100,000 light-years in diameter. Scientists can also identify stars that have left galaxies, including white and yellow stars through gravitational forces. These stars can be used as tracers, such as galaxy merger remnants, to trace galaxy evolution and motions in time and space.

Galaxies are crucial to understanding the universe's structure and evolution. They are the building blocks of the universe, and studying them can provide insights into the formation of stars and planetary systems. Observing distant galaxies allows astronomers to look back in time to the light from these galaxies, which is called the cosmic microwave background. This helps scientists understand the history of the universe and its evolution.

The study of galaxies has advanced significantly with the development of powerful telescopes and space observatories. Astronomers use the Hubble Space Telescope, the James Webb Space Telescope, and other observatories to study galaxies in detail. They also use computer simulations to model the formation and evolution of galaxies, providing insights into the complex processes that shape these celestial structures, including the role of dark matter and dark energy in their formation and evolution.

Understanding galaxies not only enhances our knowledge of the universe but also inspires curiosity about our place within it. Each galaxy is a vast and dynamic system that we hope to explore and understand in the future.
