Sustainable Growth in a Post-Scarcity World Mr Philip Sadler,2012-08-28 Over 20 years ago Philip Sadler then head of a leading British business school wrote Managerial Leadership in the Post Industrial Society In it he predicted that business would experience the most radical transformation since the Industrial Revolution of the 19th century This transformation has now taken place In his latest book Sustainable Growth in a Post Scarcity World Sadler charts developments once envisaged by Keynes Chase Galbraith and Packard and more recent radical thinkers such as Chris Anderson Sadler describes how many goods and services have moved from relative scarcity to relative abundance and asks how this trend can be reconciled with the global issues of population growth and climate change He assesses the impact of new technologies new energy sources new materials and the development of artificial intelligence on business government and economics and discusses the challenges ahead the creation of new business models the need to meet people s legitimate expectations of improved living conditions while avoiding environmental catastrophe and the need to adapt ideas developed in scarcity to conditions of abundance Why is it that in countries foremost in creating post scarcity conditions millions are still in poverty and billions worldwide still lack basic necessities of life Philip Sadler agrees with those who say the relief of global poverty cannot rely on aid and corporate philanthropy He explores the idea of re engineering products and delivering them into bottom of the pyramid BOP markets and concludes that the more global companies take this route as some are already doing the more profitable they will find it and this will in turn help the poorest people who currently pay more for goods and services the poverty penalty than the rich
