Leading the AI Agenda: The Role of CIOs versus CTOs in Shaping AI Orientation** Maximilian Fröhlich, 2026-02-19 Master's Thesis from the year 2025 in the subject Business economics grade 1-3 University of Münster Lehrstuhl für Entrepreneurship language English abstract Abstract With the growing significance of artificial intelligence AI

the examination of a company's overall strategic alignment towards the development and use of AI referred to as AI orientation has captured increased attention in the literature. However, the impact of technology-focused TMT roles on such strategic alignment in U.S. companies remains ambiguous. Building on Upper Echelons Theory, this study investigates the influence of chief information officers (CIOs) and chief technology officers (CTOs) on firms' AI orientation by analyzing question and answer sections from earnings conference calls. Based on the premise that IT and AI investments are strongly interdependent within firms, this study also explores the moderating effect of industry IT intensity. Using a panel dataset comprising 3,811 firm-year observations of U.S. S&P 500 companies from 2012 to 2020, the results confirm a positive effect of CTO presence on AI orientation. Unexpectedly, no significant effect of CIO presence or a moderating effect of industry IT intensity on the relationship between CIO/CTO and AI was identified. These findings not only highlight the strategic importance of the CTO role in U.S. companies but also underscore differences between CIO and CTO roles. This study contributes to the literature by exploring the distinct impacts of specific TMT roles on AI orientation in U.S. firms and identifying relevant areas for future research, such as a deeper analysis of the differences between IT and AI in companies and the role of AI literacy within the TMT.

6 "How Much Would You Pay For Love" Francisco Jerbesson De Freitas Morais, 2026-02-22 Official Saga Synopsis. How Far Would You Pay for Love. In contemporary Rio de Janeiro, a city where beauty hides invisible wars, Helena Moura, an art restoration specialist, discovers that an ancient painting is not merely a historical artifact. It is a secret, a silent map of hidden power spanning decades, connecting businessmen, politicians, judges, and institutions that control the city's fate without ever revealing themselves. When records about the painting's origin begin to mysteriously disappear, Helena realizes her entire life has been pushed into a reality where the truth is dangerous, not only to those who expose it but to everyone they love. Within the same labyrinth lives Gabriel Alencar, a corporate lawyer accustomed to navigating between ethics and survival. He understands the rules of the game. Helena despises and knows that in that world, innocence protects no one. Their meeting is not an ordinary romance. It is an involuntary pact. As three invisible forces struggle for control of power—the sophisticated Casino League, the expansionist Guanabara Alliance, and the silent Order of the Golden Hill—every decision the couple makes triggers irreversible waves of consequences. In this universe, justice is relative; reputation can be destroyed in an instant, and institutional protection may save bodies but it never saves hearts. Because in this story, there is only one absolute law: Love never saves. Love demands a price. And the question...
