Critical Perspectives on Economics of Education Silvia Mendolia, Martin O'Brien, Alfredo R. Paloyo, Oleg Yerokhin, 2022-05-18 This book brings together leading scholars in the field to provide insights on economics of education. The book begins with an overview of education and human capacity development and looks at the production of education through individuals learning, education financing, and the role of individual circumstances. It also analyses the complex relationship between education and mobility and highlights what key challenges for education systems in a global world are. Each chapter provides detailed analysis of interesting and policy relevant topics in the fields of education, economics, and human capacity development. This book is a useful reference for those who wish to understand the changing landscape and models of higher education in the context of digital advances and innovation. It will also be of interest to those in the areas of education and training.

Student Debt William Elliott III, Melinda K. Lewis, 2017-01-26 Offering answers to essential questions about student debt and many connected issues, this book examines student debt in the United States at every stage of the process, from the banks that issue the loans to the colleges and universities that collect the payments. Student lending in the United States is one of the most controversial issues in contemporary American discourse. Are these loans the only option for Americans who want to attend college and university in order to attain the best careers and have a productive, enjoyable life? Should the predatory lending practices of for-profit colleges and universities be stopped? How can limits be imposed on student lending amounts without preventing students from getting the education they need to succeed? The book explains why so many students are borrowing large amounts of money to attend college, considers whether the cost of higher education is simply too high, and if there should be a cap on how much money students can borrow. It explains what is contributing to the rising rate of borrowers defaulting on their loans and predicts whether the so-called student loan bubble is in danger of popping. The Data and Documents chapter analyzes data gathered from discussions about student debt. This information enables readers to better understand who is borrowing student loans, what the money from the student loans is going toward, what individuals have the authority to decide who qualifies for these loans, and what is being done to curb wasteful student spending.

House of Commons - Committee of Public Accounts: Student Loan Repayments - HC 886 Great Britain: Parliament: House of Commons: Committee of Public Accounts, 2014-02-14 There is at present around 46 billion of outstanding student loans on the Government's books, and this figure is set to rise dramatically to 200 billion by 2042 in 2013 prices. By 2042 there will be an estimated 6.5 million borrowers of student loans. At the same time, estimates for the amount of loans that will not be repaid are also rising, and the Government assumes that 35-40% of outstanding loans will never be repaid. That is some 16 billion to 18 billion on the current debt of 46 billion, and 70 billion to 80 billion on the estimated value of student loans by 2042. The Department for Business, Innovation and Skills, the Department is not doing enough to secure value for money from its collection arrangements. The Department is unable to accurately forecast student loan repayments, and

does not have a sufficient understanding of the likely future cost of non repayment to the taxpayer The Student Loans Company is not doing enough to ensure that it identifies and collects all the repayments due given the substantial size of the financial assets involved and will need to demonstrate value for money from the proposed sale of the student loans book
