Which factors contribute to the fact that suppliers are increasingly looking for new trading platforms?* Manuel Weber,2021-03-30 Seminar paper from the year 2021 in the subject Business economics Trade and Distribution grade 2 0 Private University Schloss Seeburg language English abstract The aim of this research was to identify the reasons that lead Amazon sellers to move away from the marketplace and look for alternative opportunities Derived from this the research question arises Which factors contribute to the fact that suppliers are increasingly looking for new trading platforms as an alternative to the Amazon marketplace With the help of a literature research of theory and practical context hypotheses were developed which were examined by means of an expert interview Amazon is one of the largest companies in this age With its marketplace Amazon can generate the greatest reach in order to reach customers The problem that retailers currently have to deal with are on the one hand the extremely high fees that you have to pay to Amazon in order to be listed on the market at all and on the other hand the customer friendly and retailer unfriendly service from Amazon especially for complaints and returns is increasingly no longer acceptable for many retailers This means that many retailers have to look for alternative sales opportunities in order to remain competitive However it is extremely difficult to create such a simple and customer friendly online shop as Amazon or to find an alternative with the same large reach as Amazon **Customer Service on the Internet** Jim Sterne,1996-09-25 From managing your corporate image to organizing information and making it readily available to prospects this book explores both the technical and strategic issues of tapping into the very latest Web methods This book
