US popular culture paying close attention to the app's growing body of subcultures. Featuring an array of scholars from varied disciplines and backgrounds, this book uses TikTok subcultures as a point of departure from which to explore TikTok's role in US popular culture today. Engaging with the extensive and growing scholarship on TikTok from international scholars, chapters in this book create frameworks and blueprints from which to analyze TikTok within a distinctly US context, examining topics such as gender and sexuality, feminism, race and ethnicity, and wellness. Shaping TikTok as an interdisciplinary field in and of itself, this insightful and timely volume will be of great interest to students and scholars of new and digital media, social media, popular culture, communication studies, sociology of media, dance, gender studies, and performance studies.

The Chambers Dictionary Editors of Chambers, 2006. Combines authoritative definitions with the occasional humorous one. The Chambers Dictionary Ian Brookes, 2006. Count on our authority. *Four Battlegrounds* Paul Scharre, 2023-02-28. An NPR 2023 Books We Love Pick. One of the Next Big Idea Club's Must Read Books. An invaluable primer to arguably the most important driver of change for our future. P. W. Singer, author of *Burn In*. An award-winning defense expert tells the story of today's great power rivalry, the struggle to control artificial intelligence. A new industrial revolution has begun. Like mechanization or electricity before it, artificial intelligence will touch every aspect of our lives and cause profound disruptions in the balance of global power, especially among the AI superpowers: China, the United States, and Europe. Autonomous weapons expert Paul Scharre takes readers inside the fierce competition to develop and implement this game-changing technology and dominate the future. *Four Battlegrounds* argues that four key elements define this struggle: data, computing, power, talent, and institutions. Data is a vital resource like coal or oil, but it must be collected and refined. Advanced computer chips are the essence of computing, power, control, over chip supply chains, grants leverage over rivals. Talent is about people, which country attracts the best researchers and most advanced technology companies. The fourth battlefield is maybe the most critical: the ultimate global leader in AI will have institutions that effectively incorporate AI into their economy, society, and especially their military. Scharre's account surges with futuristic technology. He explores the ways AI systems are already discovering new strategies via millions of war game simulations, developing combat tactics better than any human, tracking billions of people using biometrics, and subtly controlling information with secret algorithms. He visits China's National Team of leading AI companies to show the chilling synergy between China's government, private sector, and surveillance state. He interviews Pentagon leadership and tours U.S. Defense Department offices in Silicon Valley, revealing deep tensions between the military and tech giants who control data, chips, and talent. Yet he concludes that those tensions inherent to our democratic system create resilience and resistance to autocracy in the face of overwhelmingly powerful technology. Engaging and direct, *Four Battlegrounds* offers a vivid picture of how AI is transforming warfare, global security, and the future of human freedom, and what it will take for democracies to remain at the forefront of the world order.
