Educational Assessments in the Age of Generative AI Wachira, Patrick W., Liu, Xiongyi, Koc, Selma, 2024-12-24 The

rapid and profound permeation of generative AI technology into all aspects of modern society also changes the landscape of higher education and thus leads to a compelling call to harness the power of AI for transforming higher education. One of the most significant areas of opportunity offered by generative AI is in the assessment of learning. The goal of assessment is to foster learning, especially essential for success beyond the classroom, and this can only be possible with well-designed assessments that have the potential for determining whether students have learned the content. By harnessing generative AI, assessments can be designed that have the potential to support inquiry-based learning and foster creativity, all essential for the development of a deeper conceptual understanding of content.

Educational Assessments in the Age of Generative AI contributes to the effort to bring generative AI to the forefront of assessing students' learning by exploring how the use of generative AI tools and applications can transform and revolutionize assessment practices. Furthermore, it is devoted to exploring the use of AI in assessments to measure knowledge, skills, and students' abilities in order to prepare them for careers in the 21st century. Covering topics including academic integrity, higher education, and mathematics education, this book is an excellent resource for educators, higher education administrators, policymakers, information technology support professionals, tests and assessment developers, researchers, scholars, academicians, professionals, and more.

Rewrite for Readability Tristan Behrens, 2024-04-23. Rewrite for Readability is a captivating memoir of 1 year in the life of the author, a multifaceted artist and technologist that intertwines his personal journey with the evolving landscape of Artificial Intelligence. Born in a small German village in the 1980s, the author's life is a vivid tapestry of creativity and technological exploration. From his early days drawing fantastic beasts inspired by the serene nature of the Harz Mountains to his dynamic career spanning computer science, music composition, and AI, this book offers a unique perspective on the synergy of human creativity and machine intelligence. The author's narrative is deeply personal, recounting his upbringing in a quintessential German family, his transformative childhood and youth, and his academic pursuits. Professionally, the author has achieved a doctorate in Computer Science with a focus on Artificial Intelligence and has successfully published creative music influenced by computational methods. His philosophy is rooted in the power of learning and creativity to unlock human

potential a theme that resonates throughout his story Rewrite for Readability is not just a memoir it is a testament to the harmonious collaboration between human thought and AI The author shares his experiences as an AI Music Artist in Residence and his involvement with the innovative ensemble Hexagon Machine illustrating how AI has become an integral part of his creative process The book is adorned with AI generated images complementing the narrative and inviting readers to engage their own imagination This book is a must read for anyone interested in the intersection of technology creativity and personal growth
