**Computational Nuclear Physics 1** K. Langanke, Joachim Maruhn, S.E. Koonin, 2013-11-22 A variety of standard problems in theoretical nuclear structure physics is addressed by the well documented computer codes presented in this book Most of these codes were available up to now only through personal contact The subject matter ranges from microscopic models the shell Skyrme Hartree Fock and cranked Nilsson models through collective excitations RPA IBA and geometric model to the relativistic impulse approximation three body calculations variational Monte Carlo methods and electron scattering The 5.1.4 high density floppy disk that comes with the book contains the FORTRAN codes of the problems that are tackled in each of the ten chapters In the text the precise theoretical foundations and motivations of each model or method are discussed together with the numerical methods employed Instructions for the use of each code and how to adapt them to local compilers and or operating systems if necessary are included

**Aerodynamic Design of Transport Aircraft** Tobie van den Berg, 2009-04-15 The origin of Aerodynamic Design of Transport Aircraft stems from the time when the author was appointed part time professor in the Aerospace Faculty of Delft University of Technology At the time his main activities were those of leading the departments of Aerodynamics Performance and Preliminary Design at Fokker Aircraft Company The groundwork for this book started in 1987 as a series of lecture notes consisting mainly of pictorial material with a minimum of English explanatory text After the demise of Fokker in 1996 one feared that interest in aeronautical engineering would strongly diminish As a result of this the course was discontinued and the relationship between the author and the faculty came to an end Two years later the situation was reappraised and the interest in aeronautical engineering remained so the course was reinstated with a former Fokker colleague Ronald Slingerland as lecturer The lecture notes from these courses form the foundation of this publication
