Algebra 1, 2003 **Scott, Foresman Geometry: Tests**, 1990 **Classifying the Absolute Toral Rank Two Case**

Helmut Strade, 2017-04-10 The problem of classifying the finite dimensional simple Lie algebras over fields of characteristic p is a long standing one Work on this question has been directed by the Kostrikin Shafarevich Conjecture of 1966 which states that over an algebraically closed field of characteristic $p \neq 5$ a finite dimensional restricted simple Lie algebra is classical or of Cartan type This conjecture was proved for $p \neq 7$ by Block and Wilson in 1988 The generalization of the Kostrikin Shafarevich Conjecture for the general case of not necessarily restricted Lie algebras and $p \neq 7$ was announced in 1991 by Strade and Wilson and eventually proved by Strade in 1998 The final Block Wilson Strade Premet Classification Theorem is a landmark result of modern mathematics and can be formulated as follows Every simple finite dimensional simple Lie algebra over an algebraically closed field of characteristic $p \neq 3$ is of classical Cartan or Melikian type This is the second part of a three volume book about the classification of the simple Lie algebras over algebraically closed fields of characteristic 3 The first volume contains the methods examples and a first classification result This second volume presents insight in the structure of tori of Hamiltonian and Melikian algebras Based on sandwich element methods due to A I Kostrikin and A A Premet and the investigations of filtered and graded Lie algebras a complete proof for the classification of absolute toral rank 2 simple Lie algebras over algebraically closed fields of characteristic 3 is given Contents Tori in Hamiltonian and Melikian algebras 1 sections Sandwich elements and rigid tori Towards graded algebras The toral rank 2 case **Bob Miller's Basic Math and**
