Nur, Resuloğlu, Filiz, 2018-07-06 Transmedia storytelling is defined as a process where integral elements of fiction get dispersed systematically across multiple delivery channels to create a unified and coordinated entertainment experience This process and its narrative models have had an increasing influence on the academic world in addressing both theoretical and practical dimensions of transmedia storytelling The Handbook of Research on Transmedia Storytelling and Narrative Strategies is a critical scholarly resource that explores the connections between consumers of media content and information parts that come from multimedia platforms as well as the concepts of narration and narrative styles Featuring coverage on a wide range of topics such as augmented reality digital society and marketing strategies this book explores narration as a method of relating to consumers This book is ideal for advertising professionals creative directors academicians scriptwriters researchers and upper level graduate students seeking current research on narrative marketing strategies *The Digital Evangelicals* Travis Warren Cooper, 2022-08-02 When it comes to evangelical Christianity the internet is both a refuge and a threat It hosts Zoom prayer groups and pornographic videos religious revolutions and silly cat videos Platforms such as social media podcasts blogs and digital Bibles all constitute new arenas for debate about social and religious boundaries theological and ecclesial orthodoxy and the internet's inherent

danger and value In *The Digital Evangelicals* Travis Warren Cooper locates evangelicalism as a media event rather than as a coherent religious tradition by focusing on the intertwined narratives of evangelical Christianity and emerging digital culture in the United States He focuses on two dominant media traditions media sincerity immediate and direct interpersonal communication and media promiscuity communication with the primary goal of extending the Christian community regardless of physical distance Cooper whose work is informed by ethnographic fieldwork traces these conflicting paradigms from the Protestant Reformation through the rise of the digital and argues that the tension is culminating in a crisis of evangelical authority What counts as authentic interaction Who has authority over the circulation of information While many studies claim that technology influences religion *The Digital Evangelicals* reveals how Protestant metaphors and discourses shaped the emergence of the internet and explores what this relationship with global new media means for evangelicalism
