Intelligent Technologies for Interactive Entertainment Zhihan Lv, Houbing Song, 2022-03-24 This book constitutes the refereed proceedings of the 13th International Conference on Intelligent Technologies for Interactive Entertainment INTETAIN 2021. Due to the COVID-19 global pandemic, the conference was held virtually. This year's conference put an emphasis on the future of technologies for interactive entertainment. The 25 full papers presented at the conference and thus included in this book were selected from 50 submissions and present novel and innovative work in areas including art, science, design, and engineering regarding computer-based systems or devices that provide intelligent human interaction, learning, or entertainment experiences. The papers are grouped in 2 sessions of thematic issues on emerging applications and augmented reality.

Engineering Interactive Systems Jan Gulliksen, Morten Borup Harning, Philippe Palanque, Gerrit C. van der Veer, Janet Wesson, 2008-12-18 Engineering Interactive Systems 2007 is an IFIP working conference that brings together researchers and practitioners interested in strengthening the scientific foundations of user interface design, examining the relationship between software engineering (SE) and human computer interaction (HCI), and on how user-centered design (UCD) could be strengthened as an essential part of the software engineering process. Engineering Interactive Systems 2007 was created by merging three conferences: HCSE 2007 Human-Centered Software Engineering, held for the first time; The HCSE Working Conference, a multidisciplinary conference entirely dedicated to advancing the basic science and theory of human-centered software systems engineering; It is organized by IFIP WG 13.2 on Methodologies for User-Centered Systems Design; EHCI 2007 Engineering Human Computer Interaction, held for the tenth time; EHCI aims to investigate the nature, concepts, and construction of user interfaces for software systems. It is organized by IFIP WG 13.4.2.7 on User Interface Engineering; DSV-IS 2007 Design Specification and Verification of Interactive Systems, held for the 13th time; DSV-IS provides a forum where researchers working on model-based techniques and tools for the design and development of interactive systems can come together with practitioners and with those working on HCI models and theories.

The Craft of Scientific Films Lauren Murphy, Michael Alley, 2023-08-31 This book, the first of its kind, helps scientists and engineers of all stages and disciplines share their work in a new way with movies. Today, much of scientific communication is embedded in papers and presentations, but these documents don't often extend outside of a specific academic field. By adding movies as a medium of communication, scientists and engineers can better communicate with their colleagues while also increasing their reach to students, professors, peers, potential collaborators, and the public. Scientific films help translate complex technical topics into more accessible and consumable messages. By following Lauren Murphy's filmmaking formula—planning, shooting, and editing—readers will create their very own scientific films that look professional and polished. Using tools as simple as a smartphone, readers can develop short personal stories with no cost or experience needed. This book will guide readers through all steps of the movie-making process to a finished product. Readers will evolve their creative thinking skills and use
