World Series Openai Update:

Disinformation Countermeasures and Artificial Intelligence Oleksandr Makarenko, Paul Vines, George Cybenko, Ludmilla Huntsman, 2025-12-20 The Disinformation Countermeasures and Artificial Intelligence topic collection in Frontiers in Artificial Intelligence and Frontiers in Big Data journals will address the core problems of Cognitive Security CogSec AI powered disinformation in cognitive warfare machine learning techniques to counter disinformation novel P3 public private partnership models for countering synthetic disinformation and cross disciplinary methods of building cognitive resilience to malign influence operations with the use of AI Artificial intelligence is changing the way we create and evaluate information and this is happening during an infodemic while all governments and their citizens face the important challenge of disinformation affecting politics public health e.g. COVID 19 financial markets and elections Although the impact of disinformation is intrinsically difficult to quantify and prone to overestimation in the popular consciousness specific examples such as lynchings catalyzed by disinformation spread over social media highlight that the threat it poses crosses social scales and boundaries This threat extends into the realm of military combat as early as 2019 a NATO StratCom experiment established that social media exploitation enabled successfully influencing soldiers participating in an exercise to carry out desired behaviors such as leaving their positions not fulfilling duties etc Bay and Biteniece 2019 Thus information has become a global safety issue while disinformation can kill While malign actors weaponized information for years governments have embedded information as a war fighting function The use of AI is essential for scale speed and automation of offensive and defensive online influence operations Four Battlegrounds Paul Scharre, 2023-02-28 An NPR 2023 Books We Love Pick One of the Next Big Idea Club's Must Read Books An invaluable primer to arguably the most important driver of change for our future P W Singer author of Burn In An award winning defense expert tells the story of today's great power rivalry the struggle to control artificial intelligence A new industrial revolution has begun Like mechanization or electricity before it artificial intelligence will touch every aspect of our lives and cause profound disruptions in the balance of global power especially among the AI superpowers China the United States and Europe Autonomous weapons expert Paul Scharre takes readers inside the fierce competition to develop and implement this game changing technology and dominate the future Four Battlegrounds argues that four key elements define this struggle data computing power talent and institutions Data is a vital resource like coal or oil but it must be collected and refined Advanced computer chips are the essence of computing power control over chip supply chains grants leverage over rivals Talent is about people which country attracts the best researchers and most advanced technology companies The fourth battlefield is maybe the most critical the ultimate global leader in AI will have institutions that effectively incorporate AI into their economy society and especially their military Scharre's account surges with futuristic technology He explores the ways AI systems are already discovering new strategies via millions of war game simulations developing combat tactics better than any human tracking billions of people using biometrics and subtly

controlling information with secret algorithms He visits China's National Team of leading AI companies to show the chilling synergy between China's government private sector and surveillance state He interviews Pentagon leadership and tours U S Defense Department offices in Silicon Valley revealing deep tensions between the military and tech giants who control data chips and talent Yet he concludes that those tensions inherent to our democratic system create resilience and resistance to autocracy in the face of overwhelmingly powerful technology Engaging and direct Four Battlegrounds offers a vivid picture of how AI is transforming warfare global security and the future of human freedom and what it will take for democracies to remain at the forefront of the world order

Advances on P2P, Parallel, Grid, Cloud and Internet Computing Leonard Barolli,2023-10-28 P2P Grid Cloud and Internet computing technologies have been very fast established as breakthrough paradigms for solving complex problems by enabling aggregation and sharing of an increasing variety of distributed computational resources at large scale Grid Computing originated as a paradigm for high performance computing as an alternative to expensive supercomputers through different forms of large scale distributed computing P2P Computing emerged as a new paradigm after client server and web based computing and has shown useful to the development of social networking Business to Business B2B Business to Consumer B2C Business to Government B2G Business to Employee B2E and so on Cloud Computing has been defined as a computing paradigm where the boundaries of computing are determined by economic rationale rather than technical limits Cloud computing has fast become the computing paradigm with applicability and adoption in all application domains and providing utility computing at large scale Finally Internet Computing is the basis of any large scale distributed computing paradigms it has very fast developed into a vast area of flourishing field with enormous impact on today's information societies serving thus as a universal platform comprising a large variety of computing forms such as Grid P2P Cloud and Mobile computing The aim of the book is to provide latest research findings innovative research results methods and development techniques from both theoretical and practical perspectives related to P2P Grid Cloud and Internet Computing as well as to reveal synergies among such large scale computing paradigms
