

Internship Report for Mechanical Engineering

Intern's Name: Daniel Kim

University: [University Name]

Degree Program: Bachelor of Science in Mechanical Engineering

Internship Duration: [Start Date] – [End Date]

Company: [Company Name]

Department: Engineering Department

Supervisor: [Supervisor's Name]

Position: Mechanical Engineering Intern

Executive Summary

This report details my internship experience at [Company Name], focusing on the practical application of mechanical engineering principles. It highlights the integration of academic knowledge with hands-on experience in designing, analyzing, and improving mechanical systems. The internship was a critical step in my educational journey, providing insights into the engineering process, from conception to implementation.

Introduction

The mechanical engineering internship at [Company Name] was an essential component of my Bachelor's degree program, designed to complement my theoretical studies with practical experience in the field. This opportunity allowed me to engage directly with engineering projects, offering a glimpse into the daily responsibilities and challenges faced by mechanical engineers.

Objectives

The primary objectives of my internship were to:

- Apply mechanical engineering theories and principles in real-world scenarios.

Assessment for Experiential Learning Cecilia Ka Yuk Chan, 2022-09-29 Chan's book explores the challenges in assessing experiential learning deepens our understanding and inspires readers to think critically about the purpose of assessment in experiential learning. Experiential learning has been studied and proven to be effective for student learning particularly for the development of holistic competencies i.e. 21st century skills soft skills transferable skills considered essential for individuals to succeed in the increasingly global and technology infused 21st century society. Universities around the world are now actively organising experiential learning activities or programmes for students to gain enriching and diversified learning experiences however the assessment of these programmes tends to be limited unclear and contested. Assessment plays a central role in education policies and students approach to learning. But do educators know how to assess less traditional learning such as service learning entrepreneurship cross discipline or cross cultural projects internships and student exchanges. While the current assessment landscape is replete with assessments that measure knowledge of core content areas such as mathematics law languages science and social studies there is a lack of assessments and research that focus on holistic competencies. How do we assess students ability to think critically problem solve adapt self manage and collaborate. Central to the discussion in this book is the reason students are assessed and how they should be assessed to bring out their best learning outcomes. Offering a collection of best assessment practice employed by teachers around the world this volume brings together both theoretical and empirical research that underpins assessment and perceptions of different stakeholders understanding of assessment in experiential learning from students teachers and policymakers. The idea of assessment literacy also plays an important role in experiential learning for example reflection is often used in assessing students in experiential learning but how reflection literate are educators are they aware of the ethical dilemmas that arise in assessing students. These questions are discussed in detail. The volume also introduces a quality assurance programme to recognise student development within experiential learning programmes. The book will be particularly informative to academic developers teachers students and community partners who struggle with the development and assessment for experiential learning those who plan to apply for funding in experiential learning and policymakers and senior managements seeking evidence and advice on fine tuning curricular assessment designs and quality assurance. Idiom Treatment Experiments in Machine Translation Dimitra Anastasiou, 2010-09-13 In 1975 Searle stated that one should speak idiomatically unless there is some good reason not to do so Fillmore Kay and O Connor in 1988 defined an idiomatic expression or construction as something that a language user could fail to know while knowing everything else in the language Our language is rich in conversational phrases idioms metaphors and general expressions used in metaphorical meaning These idiomatic expressions pose a particular challenge for Machine Translation MT because their translation for the most part does not work literally but logically The present book shows how idiomatic expressions can be recognized and correctly translated with the help of a bilingual idiom dictionary English German a monolingual German corpus and morphosyntactic rules The work focuses on the field of Example based Machine Translation EBMT A theory of idiomatic expressions with their syntactic and semantic properties is provided followed by the practical part of the book which describes how the hybrid EBMT system METIS II is able to correctly process idiomatic expressions A comparison of METIS II with three commercial systems shows that idioms are not impossible to translate as it was predicted in 1952 The only way for a machine to treat idioms is not to have idioms This book furnishes plenty of examples of idiomatic phrases and provides the foundation for how MT systems can process and translate idioms by means of simple linguistic resources
