*The magic of science, a manual of easy scientific experiments* James Wylde, 1873

Apocalypse Daddy Mark Fielding, 2023-02-28 Enough already Who ripped your fun out of fatherhood When did parenting become a war of attrition Didn't you get the memo Being a dad is the best damn thing that will ever happen to you It's the story of a lifetime It's your own personal Once Upon a Time You're the director The screenwriter You write the first act the second act the third act Do you want a happy beginning middle and end Then write one But you're going to have to work for it Push yourself beyond what you believe possible Invest in your daughter Invest in your son Invest in yourself When your kids' time comes and if Epictetus has taught us anything their time will come when they grow up no matter what will they know you tried your best Will you have kept those promises you made at 3 a.m. in the dark on a chill Tuesday morning in April as you sang lullabies into the delicate ear of that sleeping fragile lump of life you call your daughter I'm like you I'm a father I'm a parent I want what's best for my kids And I'll go to the end of the world to make that a reality Because it's not the end of your world but what if it was The Apocalypse Daddy isn't your traditional guide to fatherhood You'll find zero nappy reviews You won't read about car seats and bottle feeding and how to manage your sleep You won't get a breakdown of the latest gadgets or the top 5 fatherhood mishaps They'll be nothing about pregnancy or which pushchair to buy I don't care what's on your breakfast menu You'll get something much better than that Something much more actionable and powerful You'll get a reminder that the best stories are written in childhood You'll get a story about Quentin Tarantino and Reservoir Dogs and Stoicism and the ancient courts and emperors and Seneca and Diogenes and Epictetus and Aurelius

You'll learn about the power of running circles in your backyard and playing in grass with your children. You'll read about the magic of sleep deprivation and dreams of running and jumping and playing of holidays and the never ending chaos that always ends too soon. Part love letter to his children, part alternative parenting guide, part stoic meditation, part psychotic breakdown, *Apocalypse Daddy* is the story of a father and his daughter and how one Spring can last a lifetime. Joining *Apocalypse Daddy* is a cast of cultural icons: scientists, musicians, dead kings, and Schrödinger's cat. Can Buddha, Seneca, Epictetus, Bob Dylan, Diogenes, Richard Nixon, Peter Rabbit, Alfred Hitchcock, Jimi Hendrix, and Hunter S. Thompson help *Apocalypse Daddy* overcome the odds and bring education home? Is there enough time for Alice and Luca to teach *Apocalypse Daddy* about the meaning of life and what being a parent is really about? *Undistracted: In the moment* *The Saturday Review of Politics, Literature, Science and Art*, 1901 *Extreme Writing* Keen J. Babbage, 2010-03-16 In recent years, educators have become increasingly concerned about the writing skills of students in elementary, middle, and high school. They wonder what can be done to build proper writing skills, particularly in a generation of students who may consider text messaging to be the only writing a person needs to do. *Extreme Writing* describes how teachers can build upon the eagerness and skills that students apply to recreational, social, and friendly writing, bringing enjoyment back into writing for students. The *Extreme Writing* approach is not a precise formula for student achievement; rather, it is a shared discovery of the process, the adventure, the wonder, and the liberation inherent in writing. **End-to-End Data Science with SAS** James Gearheart, 2020-06-26 Learn data science concepts with real world examples in SAS. *End to End Data Science with SAS: A Hands On Programming Guide* provides clear and practical explanations of the data science environment, machine learning techniques, and the SAS programming knowledge necessary to develop machine learning models in any industry. The book covers concepts including understanding the business need, creating a modeling data set, linear regression, parametric classification models, and non-parametric classification models. Real world business examples and example code are used to demonstrate each process step by step. Although a significant amount of background information and supporting mathematics are presented, the book is not structured as a textbook but rather it is a user's guide for the application of data science and machine learning in a business environment. Readers will learn how to think like a data scientist: wrangle messy data, choose a model, and evaluate the model's effectiveness. New data scientists or professionals who want more experience with SAS will find this book to be an invaluable reference. Take your data science career to the next level by mastering SAS programming for machine learning models. **Science**, 1926 Vols for 1911-13 contain the Proceedings of the Helminthological Society of Washington.
