Leenders, Shaul M. Gabbay, 2013-03-09 In studies of inter organizational relations IOR s there is a tendency to look at dyads of firms and to consider networks as aggregates of such dyads But there are several roles for a third party a go between This chapter looks at a go between not in the sense of a middleman who intermediates in existing production or trade such as an agent wholesaler retailer and not in the sense of an entrepreneur who intermediates in the realization of new potential in connecting supply and demand It looks at a go between in the sense of a relationship counsellor for the development and maintenance of social capital providing support in setting up adapting and ending cooperative relations between others Or in yet different terms to help in the embedding of relations in Granovetter s 1985 sense Uzzi 1997a Such roles may be performed by middlemen or entrepreneurs but also by specialized agents who do not play a direct role in linking stages in a chain of production and distribution as middlemen and entrepreneurs typically do Indeed some of the roles require an independence that is served by not having a direct stake in the relations that need to be developed I propose that the analysis yields a perspective for looking at the roles of trade and industry associations in European business systems and of banks and trading houses in Japanese enterprise groups Kigyo Shudan **The Report: Qatar 2009**, 2004 [The Commercial and Financial Chronicle](#), 1927 **Economic Review**, 2004 *Making the Majors* Eric M. Leifer, 1995 In this in depth look at

major league sports Eric Leifer traces the growth and development of major leagues in baseball football basketball and hockey and predicts fundamental changes as the majors pursue international expansion He shows how every past expansion of sports publics has been accompanied by significant changes in the way sporting competition is organized With each reorganization the majors have created teams closer in ability bringing repetition to competition across time only to expand and energize the public s search for differences between teams and for events that disrupt the repetitive flow The phenomenal success of league sports Leifer writes rests on their ability to manufacture inequalities for fans to latch on to without jeopardizing the equalities that draw fans in Leifer supports his theory with historical detail and statistical analysis He examines the special concerns of league organizers in pursuing competitive balance and presents a detailed analysis of how large city domination has been undermined in the modern era of Major League Baseball Using games from the four major league sports he then shows how fans can themselves affect the course of competition In NFL football for example fans account for nearly all of the persisting inequality in team performance The possibility of sustaining inequality among equals emerges from the cross pressures that fans and leagues place on competition With substantial data in hand Leifer asks the essential question facing the leagues today how can they sustain a situation that depends entirely on simultaneous equality and contention one in which fan involvement may evaporate as soon as one team dominates His answer has significant implications for the future of major league sports both nationally and internationally **Moody's Magazine** ,1913 **The Rand McNally Bankers' Monthly** ,1913 **Banking** ,1921 I.B.A. of A.
