Meat Processing, 1987

The Complete Book on Meat Processing And Preservation with Packaging Technology NIIR Board of Consultants & Engineers, 2005-10-01 Meat was originally processed to preserve it but since the various procedures cause so many changes in texture and flavour it is also a means of adding variety to the diet Processing also provides scope to mix the less desirable parts of the carcass with lean meat and in addition is a means of extending meat supplies by including other foodstuffs such as cereal in the product Food preservation is a method of maintaining foods at a desired level of properties or nature for their maximum benefits Preservation usually involves preventing the growth of bacteria yeasts fungi and other micro organisms although some methods work by introducing bacteria or fungi to the food as well as retarding the oxidation of fats which cause rancidity Today meat is processed with salt colour fixing ingredients and seasonings in order to impart desired palatability traits to intact and comminuted meat products Products intermediate to these categories are sectioned or chunked and formed meats There are various methods for the preservation of meat curing dry curing smoking canning freezing dehydration fat extraction wet or steam rendering etc Meat curing agents include sodium chloride nitrite ascorbate or erythorbate and possibly sodium phosphate sucrose dextrose or corn syrup and seasonings The salt content of processed meats varies 1 to 12% according to the type of product Many intact and comminuted cured meat products are smoked to impart a desirable smoked flavour and colour The smoking process many also include a drying or cooking cycle depending on the product Canned meats may be processed to be commercially sterile or semi preserved The objective of commercial sterilization is to destroy all harmful bacteria or bacteria that may cause spoilage of the product under normal unrefrigerated storage However the process does not kill the spores of all heat resistant bacteria Frozen meat can be kept at low temperatures for many months Freezing and subsequent thawing produce changes in the structure of meat that affect its physical properties If meat is frozen very rapidly at low temperatures the ice crystals are small and form within the fibers The drip loss upon thawing is generally greater in slow frozen than in quick frozen meat Freeze drying meat extends shelf life and reduces weight The meat is readily defrosted by immersing in water before cooking Under optimum processing and storage conditions reconstituted meats have acceptable flavour colour texture and nutrient retention The meat packing industry handles the slaughtering processing packaging and distribution of animals such as cattle pigs sheep and other livestock The

basic purpose of packaging is to protect meat and meat products from undesirable impacts on quality including microbiological and physio chemical alterations Packaging protects foodstuffs during processing storage and distribution from contamination by dirt by contact with surfaces and hands microorganisms bacteria moulds and yeasts parasites mainly insects toxic substances chemicals influences affecting colour smell and taste off odour light oxygen loss or uptake of moisture As such due to the recent up gradation of preservation techniques the preservation industry is also growing almost at the same rate as the food industry which is about 10 to 12% per year Some of the fundamentals of the book are meat product simultaneous flavouring and tenderizing synthetic flavouring preservation moisture retention and surface protection antimicrobial treatment antioxidant application to freeze dried meats packaging and handling for storage and transportation continuous steam cooking of ground meat activators of natural proteolytic enzymes isotonic enzyme solution with specific activity inactivation of enzymes with high pressure etc The origin of meat processing is lost in antiquity but probably began when primitive humans first learned that salt is an effective preservative and that cooking prolongs the keeping quality of fresh meat This book includes the processing of fresh meats the different curing agents method of curing smoking and manufacturing of various meat products such as sausages canned meat cured and smoked meats etc The book is very useful for entrepreneurs technocrats and those who want to venture in to this field TAGS All about the Meat Processing Industry Beef Meat Processing Technology Beef Products Best small and cottage scale industries Book of Meat and Meat Processing Book on Meat Processing and Preservation Business guidance for Meat processing Business Plan for a Startup Business Business Plan for Small Meat Plant Business start up Complete book on meat processing Cured meat cuts How to Cure Meat How to Start a Meat processing industry How to Start a Meat Production Business How to start a successful Meat processing business How to Start Meat Processing Industry in India How to Start Meat Processing Industry Livestock Processing Meat and Poultry Meat Based Profitable Projects Meat Based Small Scale Industries Projects Meat cutting and packaging Meat industry facts Meat packing industry Meat packing plants Meat processing Business Meat Processing Industry in India Meat processing industry Meat Processing Meat Industry Poultry Meat processing process Meat Processing Projects Meat processing technology Method of processing meat Methods of processing and preservation of meat Methods of processing meat and poultry Methods Used to Make Processed Meat Modern small and cottage scale industries Most Profitable Meat Processing Business Ideas Packaging of fresh and processed meat Poultry and meat packaging Processed Meat and Meat Preservatives Processing Meat and Livestock Processing of meat and meat products Profit from Production Beef Processing Profitable small and cottage scale industries Profitable Small Scale Meat processing industry Project for startups Sausage making Sausage Making Formulation and Processing Sausage Manufacturing Sausage processing plant Sausage production Science of Poultry and Meat Processing Setting up and opening your meat processing business Small Scale Meat Processing Small Scale Meat Processing Projects Small scale Meat production line Small scale sausage production Small Start up

Meat is both a major food in its own right and a staple ingredient in many food products. With its distinguished editors and an international team of contributors, *Meat Processing* reviews research on what defines and determines meat quality and how it can be maintained or improved during processing. Part one considers the various aspects of meat quality. There are chapters on what determines the quality of raw meat, changing views of the nutritional quality of meat and the factors determining such quality attributes as colour and flavour. Part two discusses how these aspects of quality are measured, beginning with the identification of appropriate quality indicators. It also includes chapters on both sensory analysis and instrumental methods, including on-line monitoring and microbiological analysis. Part three reviews the range of processing techniques that have been deployed at various stages in the supply chain. Chapters include the use of modelling techniques to improve quality and productivity in beef cattle production, new decontamination techniques after slaughter, automation of carcass processing, high pressure processing of meat, developments in modified atmosphere packaging and chilling and freezing. There are also chapters on particular products such as restructured meat and fermented meat products. With its detailed and comprehensive coverage of what defines and determines meat quality, *Meat Processing* is a standard reference for all those involved in the meat industry and meat research. Reviews research on what defines and determines meat quality and how it can be measured, maintained and improved during processing. Examines the range of processing techniques that have been deployed at various stages in the supply chain. Comprehensively outlines the new decontamination techniques after slaughter and automation of carcass processing.

Handbook of Meat Processing Fidel Toldrá, 2010-01-21. This handbook comprehensively presents the current status of the manufacturing of the most important meat products. Editor and renowned meat expert Fidel Toldrá heads an international collection of meat scientists who have contributed to this essential reference book. Coverage is divided into three parts. Part one, Technologies, begins with discussions on meat chemistry, biochemistry and quality and then provides background information on main technologies involved in the processing of meat such as freezing, cooking, smoking, fermentation, emulsification, drying and curing. Also included are key chapters on packaging, spoilage prevention and plant cleaning and sanitation. Part two, Products, is focused on the description of the manufacture of the most important products, including cooked and dry-cured hams, cooked and fermented sausages, bacon, canned meat, pat, restructured meats and functional meat products. Each chapter addresses raw materials, ingredients and additives, processing technology, main types of products, production data, particular characteristics and sensory aspects and future trends. Part three, Controls, offers current approaches for the control of the quality and safety of manufactured meat products, with coverage including sensory evaluation, chemical and biological hazards, including GMOs, HACCP and quality assurance. This book is an invaluable resource for all meat scientists, meat processors, R & D professionals and product developers. Key features: Unparalleled international expertise of editor and contributing authors. Addresses the state of the art of manufacturing the most important
