McKelvey Semiconductor Physics:

Solid State and Semiconductor Physics John Philip McKelvey, 1986 *Solid State Physics* J. S. Blakemore, 1985-12-12
Updated to reflect recent work in the field this book emphasizes crystalline solids going from the crystal lattice to the ideas of reciprocal space and Brillouin zones and develops these ideas for lattice vibrations for the theory of metals and for semiconductors The theme of lattice periodicity and its varied consequences runs through eighty percent of the book Other sections deal with major aspects of solid state physics controlled by other phenomena superconductivity dielectric and magnetic properties and magnetic resonance **Solid State and Semiconductor Physics**, 1971 **Physics of Semiconductor Devices** J.-P. Colinge, C.A. Colinge, 2007-05-08 Physics of Semiconductor Devices covers both basic classic topics such as energy band theory and the gradual channel model of the MOSFET as well as advanced concepts and devices such as MOSFET short channel effects low dimensional devices and single electron transistors Concepts are introduced to the reader in a simple way often using comparisons to everyday life experiences such as simple fluid mechanics They are then explained in depth and mathematical developments are fully described Physics of Semiconductor Devices contains a list of problems that can be used as homework assignments or can be solved in class to exemplify the theory Many of these problems make use of Matlab and are aimed at illustrating theoretical concepts in a graphical manner **Heterostructure Lasers Part A** H.C. Jr. Casey, 2012-12-02 Heterostructure Lasers Part A Fundamental Principles deals with the fundamental principles preparation and operating characteristics of heterostructure lasers Each major topic is introduced along with the basic laws that govern the observed phenomena The expressions relevant to heterostructure lasers are derived from the basic laws and realistic numerical examples based on the GaAs Al_xGa_{1-x}As heterostructure are given This book is comprised of four chapters and begins with a discussion on some of the early studies of injection lasers and an overview of the fundamental concepts of heterostructure lasers Stimulated emission and room temperature continuous wave operation with injection lasers are described together with the fundamentals of waveguiding gain and carrier confinement in heterostructures Optical fields and wave propagation are considered along with slab electric waveguides the relationships between absorption stimulated emission and spontaneous emission optical absorption and emission rates in semiconductors and electrical properties of heterojunctions This monograph will be of interest to physicists **Dopants and Defects in Semiconductors** Matthew D. McCluskey, Eugene E. Haller, 2018-02-19 Praise for the First Edition The book goes beyond the usual textbook in that it provides more specific examples of real world defect physics an easy reading broad introductory overview of the field Materials Today well written with clear lucid explanations Chemistry World This revised edition provides the most complete up to date coverage of the fundamental knowledge of semiconductors including a new chapter that expands on the latest technology and applications of semiconductors In addition to inclusion of additional chapter problems and worked examples it provides more detail on solid state lighting LEDs and laser diodes The authors have

achieved a unified overview of dopants and defects offering a solid foundation for experimental methods and the theory of defects in semiconductors Matthew D McCluskey is a professor in the Department of Physics and Astronomy and Materials Science Program at Washington State University WSU Pullman Washington He received a Physics Ph D from the University of California UC Berkeley Eugene E Haller is a professor emeritus at the University of California Berkeley and a member of the National Academy of Engineering He received a Ph D in Solid State and Applied Physics from the University of Basel Switzerland *The Effects of Radiation on Electronic Systems* George Messenger, Milton S.
