Machine Learning Methods for Ecological Applications Alan H. Fielding, 2012-12-06 It is difficult to become an ecologist without acquiring some breadth For example we are expected to be competent statisticians and taxonomists who appreciate the importance of spatial and temporal processes whilst recognising the potential offered by techniques such as RAPD It is therefore with some trepidation that we offer a collection of potentially useful methods that will be unfamiliar and possibly alien to most ecologists I don t feel old but when I was undertaking my postgraduate research our lab calculator was mechanical There was great excitement in my final year when we obtained an unbelievably expensive electronic calculator Later I progressed to running obs on a PRIME minicomputer via a collection of punched cards Those who complain about the problems with current computers don t know how lucky they are In 1984 I wrote a book entitled Computing for Biologists Although it was mainly concerned with writing short programs it did also look at wider aspects of the role of computers in the biological sciences Machine learning was not mentioned in that book probably because of ignorance but also because the methods were relatively unknown outside of the relatively small number of workers in the broad field that is now known as machine learning During 1985 I spent a sabbatical year at York University following their Biological Computation masters
