It also gives an insight in the changes brought about in our future everyday lives. Autonomous vehicles are the future of the automobile industry. Automated driving (AD) also called self-driving raises however several multiple questions among them those of user safety and acceptance. Comprehensive HMI system design with windshield display techniques will be necessary to deal with driving task delegations bringing the use of VR or augmented reality (AR) technologies. In addition the use of VR for all the vehicle interiors will progressively be proposed for entertainment online business activities and for modified visual motion perception to alleviate car sickness a form of motion sickness. Indeed car sickness is already well known for many passengers especially when reading or operating smartphones or other display devices. It is called to increase significantly with the introduction of autonomous vehicles where all users will be for long periods in various sitting positions. These two new trends AD and VR are already modifying our relationship with the world and the society. All together they will change our way of life forever.
