Concurrent Training Mastery Keith Engelbrecht,2025-12-11 Master the science of concurrent training before you master the practice Most coaches understand that athletes need multiple physical qualities simultaneously But they don't understand why concurrent training is so challenging or how to make it work The problem Interference When you train strength on Monday and endurance on Wednesday one quality can inhibit adaptation in the other Your nervous system hormones and energy systems face conflicting demands The result Both qualities progress slower than if you trained them separately But interference can be minimized with the right knowledge Concurrent Training Foundations provides the scientific foundation every coach needs Part 1 Physiological Foundations How energy systems work PCr system anaerobic glycolytic aerobic oxidative How muscles actually adapt to training stimulus response adaptation How the nervous system responds to different training stresses Why concurrent training creates unique physiological demands Part 2 The Interference Effect What interference is and why it occurs 4 distinct mechanisms Research evidence on interference magnitude When interference becomes a serious problem Strategic approaches to minimizing interference Individual differences in interference susceptibility Strategic Overview The complete logic chain from physiology to practice How to think about concurrent training systematically Conceptual framework for all subsequent learning This is not a quick read It's deep evidence based science But it's written for coaches not researchers You'll understand WHY interference occurs HOW much it matters WHAT research shows about minimizing it HOW this knowledge changes your coaching decisions Read this first Master the foundation Then everything else makes sense The Concurrent Training System Volume 1 of 3
