

ELEMENTS OF PROGRAMMING INTERVIEWS

"A practical, fun approach to computer science fundamentals, as seen through the lens of common programming interview questions."

— Jeff Atwood / Co-founder, Stack Overflow and Discourse

"This book prepares the reader for contemporary software interviews, and also provides a window into how algorithmic techniques translate into the workplace. It emphasizes problems that stem from real-world applications and can be coded up in a reasonable time, and is a wonderful complement to a traditional computer science algorithms and data structures course."

— Ashish Goel / Professor, Stanford University

"A terrific resource for anyone preparing for a modern software engineering interview: work through the entire book, and you'll find the actual interview a breeze. More generally, for algorithms enthusiasts, EPI offers endless hours of entertainment while simultaneously teaching neat coding tricks."

— Vineet Gupta / Principal Engineer, Google

EPI is your comprehensive guide to interviewing for software development roles.

The book begins with a summary of the nontechnical aspects of interviewing, such as strategies for a great interview, common mistakes, perspectives from the other side of the table, tips on negotiating the best offer, and a guide to the best ways to use EPI. We also provide a summary of data structures, algorithms, and problem solving patterns.

Coding problems are presented through a series of chapters on basic and advanced data structures, searching, sorting, algorithm design principles, and concurrency. Each chapter starts with a brief introduction, a case study, top tips, and a review of the most important library methods. This is followed by a broad and thought-provoking set of problems.

Adnan, Tsung-Hsien, and Amit have worked at Google, Facebook, Uber, Microsoft, IBM, Qualcomm, and several start-ups. They co-developed algorithms and systems that are used by billions of people everyday. They have extensive experience with interviewing candidates, making hiring decisions, and being interviewed.
