Engineering Physics 1 P Mani:

Micro- and Nanoscale Fluid Mechanics Brian J. Kirby, 2010-07-26 This text focuses on the physics of fluid transport in micro and nanofabricated liquid phase systems with consideration of gas bubbles solid particles and macromolecules This text was designed with the goal of bringing together several areas that are often taught separately namely fluid mechanics electrostatics and interfacial chemistry and electrochemistry with a focused goal of preparing the modern microfluidics researcher to analyse and model continuum fluid mechanical systems encountered when working with micro and nanofabricated devices This text serves as a useful reference for practising researchers but is designed primarily for classroom instruction Worked sample problems are included throughout to assist the student and exercises at the end of each chapter help facilitate class learning

Emerging Sustainable and Renewable Composites A. Atiqah, S. M. Sapuan, R. A. Ilyas, Z. M. A. Ainun, K. Z. Hazrati, 2024-07-03 This edited volume presents a comprehensive discussion of emerging sustainable and renewable composites from tropical fibres and provides an in depth analysis of their prospective applications as replacements for conventional petroleum based packaging and the challenges regarding this Readers will gain a comprehensive understanding of the development and characterization of sustainable and renewable composites from fibres such as sugar palm kenaf sisal curau and coir They will also learn about new potential materials from such fibres and their potential use in various nanoelectronics applications Each chapter provides recent insight from some of the field s most prominent industry and academic professionals Chapter contributors present valuable case studies and describe related

environmental issues environmental advantages and challenges Topics include biodegradability tensile and other physical properties and applications Consequently readers can apply this knowledge to the further development of sustainable and renewable composites toward their global use in place of petroleum based materials and in new electronics products This book is an invaluable and accessible guide for researchers and postgraduate students of composites engineering and nanotechnology who wish to learn more about composites from tropical fibres and their applications The practical information will benefit those who wish to advance research in this field and promote the adoption of these materials in areas including packaging and nanoelectronics
