These methodologies are crucial in enabling informed decision-making and driving transformative advancements across many fields, industries, and domains. This book offers an overview of latest tools, methods, and approaches while also highlighting their practical use through various applications and case studies. [Global Strategy](#) Sali Li, Noman Shaheer, 2025-01-09. *Global Strategy: A Market Creation Approach* is a groundbreaking textbook that redefines the field of global strategy, shifting the focus from scaling established businesses to creating innovative businesses responding to international market needs. Authors Sali Li and Noman Shaheer equip future multinational leaders with the tools and insights needed to succeed in the rapidly evolving world of global business. **Intersecting Natural Language Processing and FinTech Innovations in Service Marketing** J Nair, Arjun, Manohar, Sridhar, B. Limbu, Yam, A. Huhmann, Bruce, 2025-04-25. Disruptive paradigms emerge from the accelerating advancements in natural language processing (NLP) and financial technology (FinTech), which present unparalleled opportunities in customer engagement. In an era where personalized experiences and sophisticated artificial intelligence (AI) interactions are pivotal for brand success, it is imperative

for businesses to capitalize on AI's capabilities for customer needs. By translating theoretical progress into actionable strategies, business can craft deeply personalized messages and experiences. Adopting these technologies to meet evolving consumer expectations and cultivating enduring customer loyalty is of strategic importance. Intersecting Natural Language Processing and FinTech Innovations in Service Marketing provides a meticulous analysis of these underlying technologies bolstered by empirical case studies demonstrating successful integrations. Critical issues such as data privacy, security, and ethical considerations are also addressed, offering a comprehensive perspective on the opportunities and challenges inherent in this dynamic field. Covering topics such as pricing, insinuations, key performance indicators (KPIs), and vulnerable consumers, this book is an excellent resource for computer engineers, marketers, policymakers, business owners, researchers, academicians, and more.

Redundancy at information and data level Niklas Haug, 2024-08-02 Research Paper undergraduate from the year 2024 in the subject Computer Science General grade 1 0 language English abstract Almost any system used in daily life relies on transmitting data Whether it s sending a message to a friend transferring money to a bank account or streaming a movie on Netflix data is being transmitted from one point to another However data transmission is not always error free Errors from both humans and machines are quite common and can occur due to various reasons including Transposed digits e g when typing an IBAN or an amount of money into a banking app Noise in the communication channel Interference in wireless communications Hardware malfunctions or software bugs Although we cannot eliminate the occurrence of errors true to the motto Shit happens we can implement measures to detect these errors and ideally correct them without having to retransmit the corrupted data a process known as Forward Error Correction FEC These measures range from simple methods such as checksums implemented in numbers used every day e g IBAN ISBN EAN to complex algorithms like Reed Solomon codes

used in communication systems and storage devices For instance the ability to correct errors allows data on a CD which may be partly corrupted due to physical scratches to be reconstructed and ensures that QR codes remain scannable and decodable even when partially soiled or illegible
