section In the context of the development of process technology this book advocates the importance of delineating and clarifying corporate work processes Various environments for development work are discussed from initial test work to pilot plant testing and the use of demonstration facilities to achieve lean process innovation The importance of an open collaborative approach is stressed This includes involving external equipment manufacturers at an early stage as well as collaborative development of customers use of the products in their production processes with a view to excellence in future application development Process innovation will not however generate profit or reduce operating costs until the new or improved process technology is operating well in the plant Best practice for start up of new process technology and process plants is examined starting with a fresh outlook on technology transfer in general This often neglected area of management of process innovation is in fact of an importance equivalent to that of a product launch in the development of new products The final part of the book closes the circle discussing how to implement and measure the strategic intent of process innovation Improving the general performance of corporate process innovation is then covered by going through success factors and key performance indicators and their aggregation on a corporate level
