Who is responsible for imposing an IT governance model encompassing IT strategy, information security, and formal enterprise architectural mandates? - **IT executives and the Board of Directors**

The party that performs strategic planning, addresses near-term and long-term requirements aligning business objectives, and technology strategies. - **The Steering Committee**

What three elements allow validation of business practices against acceptable measures of regulatory compliance, performance, and standard operational guidelines. - **(1.) Policies (2.) Procedures (3.) Standards**

What activity involves the identification of potential risk and the appropriate response for each threat based on impact assessment using qualitative and/or quantitative measures for an enterprise-wide risk management strategy? - **Risk Management**

IT Governance is most concerned with.... - **IT Strategy**

Describe the advantages of outsourcing. - Outsourcing is an opportunity for the organization to focus on core competencies. When an organization outsources a business function, it no longer needs to be concerned about training employees in that function. Outsourcing does not always reduce costs, because cost reduction is not always the primary goal of outsourcing.

An external IS auditor has discovered a segregation of duties issue in a high value process. What is the best action for the auditor to take? - **The external auditor can only document the finding in the audit report. An external auditor is not in a position to implement controls.**

An organization has chosen to open a business office in another country where labor costs are lower and has hired workers to perform business functions there. This organization has done what? - **The organization is insourcing - while they may have opened the office in a foreign country, they have hired locals to do the work as opposed to contracting with a third party.**

An organization has discovered that some of its employees have criminal records. What is the best course of action for the organization to take? - **The organization should have background checks performed on all of its existing employees and also begin instituting background checks of all new-hires. It is not necessarily required to terminate the employees - their offenses may not warrant termination.**

The options for Risk Treatment are: - Risk Mitigation Risk Avoidance Risk Transfer Risk Acceptance

Cybersecurity Public Policy Bradley Fowler, Kennedy Maranga, 2022-06-23 Since 2000 many governments parliaments and ministries have worked diligently to define effective guidelines that safeguard both public and private sector information systems as well as information assets from unwanted cyberattacks and unauthorized system intrusion While some countries manage successful cybersecurity public policies that undergo modification and revision annually other countries struggle to define such policies effectively because cybersecurity is not a priority within their country For countries that have begun to define cybersecurity public policy there remains a need to stay current with trends in cyber defense and information system security information not necessarily readily available for all countries This research evaluates 43 countries cybersecurity public policy utilizing a SWOT analysis Afghanistan Australia Bermuda Canada Chili Croatia Cyprus Czech Republic Dubai Egypt Estonia European Union Finland Gambia Germany Greece Hungary Iceland Ireland Italy Japan Kenya Kosovo Kuwait Luxemburg Malaysia Nepal Netherlands New Zealand Norway Poland Samoa Singapore Slovakia South Africa Sweden Switzerland Thailand Trinidad Uganda United Arab Emirates

United Kingdom and Vietnam to transparently discuss the strengths weaknesses opportunities and threats encompassing each of these 43 countries cybersecurity public policies The primary vision for this title is to create an educational resource that benefits both the public and the private sectors Without clarity on cybersecurity public policy there remains a gap in understanding how to meet these needs worldwide Furthermore while more than 43 countries have already enacted cybersecurity public policy many countries neglect translating their policy into English this impacts the ability of all countries to communicate clearly and collaborate harmoniously on this subject matter This book works to fill the gap stop the spread of misinformation and become the gateway to understanding what approaches can best serve the needs of both public and private sectors Its goals include educating the public and in partnership with governments parliaments ministries and cybersecurity public policy analysts helping mitigate vulnerabilities currently woven into public and private sector information systems software hardware and web interface applications relied upon for daily business activities

CISA and CISM ExamFOCUS Study Notes and Review Questions 2014 ExamReview, 2013-10-20

CISA and CISM are NOT pure technical certs In fact they tend to focus more on the policies programs auditing and management side of IS There are technical questions but the questions are not like those that you can find in the MS Cisco exams CISA topics The Process of Auditing Information Systems Governance and Management of IT Information Systems Acquisition Development and Implementation Information

Systems Operations Maintenance and Support Protection of Information Assets CISM topics Information Security Governance Information Security Program Development Information Security Program Management Incident Management and Response You need to know the basics of new IT technologies but you also need to know the older technologies since many old stuff are still at work in the modern business world CISA and CISM are supposed to be different in that one focuses on auditing and another on management HOWEVER they are practically sharing many of the knowledge areas Think about it the IS auditor needs to know management so they can audit IS management On the other hand management needs to know IS auditing so they can request for and evaluate the various audit options Experience shows that clear cut boundaries between the involved topics can hardly be established Studying on a track by track basis may save you time but the coverage received may not be sufficient for clearing the exam In fact it may be a way better approach for you to go through everything included in this guide as a whole rather than to restrict your focus on the track specific topics when they overlap so much you better play safe When we develop our material we do not classify topics the BOK way We follow our own flow of instructions which we think is more logical for the overall learning process Don t worry it does not hurt to do so as long as you truly comprehend the material To succeed in the exams you need to read as many reference books as possible There is no single book that can cover everything This ExamFOCUS book focuses on the more difficult topics that will likely make a difference in exam results The book is NOT intended to guide you through every single official topic You should therefore use this book together with other reference books for the best possible preparation outcome
