*Researching Subtitling Processes* Anke Radinger, 2025-07-31 Subtitling is almost as old as the motion picture itself. It is a very specific form of translation that goes well beyond the transferring of written texts given that the source text the film is a complex combination of spoken and written text together with dynamic images, music, and sounds. But how does one read a film in order to translate it? In this volume, Anke Radinger investigates what happens in a subtitler's mind, especially in various working environments. An example of one of these conditions is the introduction of innovative assistive language tools such as AI-powered speech-to-text into traditional subtitling workflows. Using methods like eye tracking and keylogging, Radinger reviews computer or rather AI-assisted subtitling processes, practices, and workflows while concentrating on aspects such as effort and quality. Her work is a valuable contribution to subtitling process research. SPR, a young and greatly under-researched subfield of audiovisual translation.

**From Networks to Netflix** Derek Johnson, 2018-01-03 Even as the television industry experiences significant transformation and disruption in the face of streaming and online delivery, the television channel itself persists. If anything, the television channel landscape has become more complex to navigate as viewers can now choose between broadcast, cable, streaming, and premium services across a host of different platforms and devices. *From Networks to Netflix* provides an authoritative answer to that navigational need, helping students, instructors, and scholars understand these industrial changes through the lens of the channel. Through examination of emerging services like Hulu and Amazon Prime Video, investigation of YouTube channels, and cable outlets like Freeform and Comedy Central, and critiques of broadcast giants like ABC and PBS, this book offers a concrete, tangible means of exploring the foundations of a changing industry.

**Introducing Audiovisual Translation** Agnieszka Szarkowska, Anna Jankowska, 2024-09-30 This user-friendly textbook offers comprehensive insights into all facets of audiovisual translation and media localisation. Serving as a comprehensive guide spanning seven chapters, it begins by introducing audiovisual translation (AVT). It goes on to explore the historical backdrop and highlights the distinctions from traditional written text translation. The authors expertly navigate you through the primary AVT modalities: interlingual subtitling, dubbing, voice-over, subtitling for the deaf and hard of hearing, live subtitling, and audio description. A blend of theoretical concepts and practical, real-world examples in various languages ensures a seamless understanding of the fundamental principles of AVT. The book clearly guides you through the most important aspects of each type of AVT. Designed for those exploring various AVT forms, budding audiovisual translators, and those interested in contemporary AVT trends and research, this book is an invaluable resource for students of translation and linguistics and for educators in AVT across higher education and media localisation programmes.
