The Routledge Companion to Accounting Education Richard M.S. Wilson,2014-04-29 Many enquiries into the state of accounting education training undertaken in several countries over the past 40 years have warned that it must change if it is to be made more relevant to students to the accounting profession and to stakeholders in the wider community This book's overriding aim is to provide a comprehensive and authoritative source of reference which defines the domain of accounting education training and which provides a critical overview of the state of this domain including emerging and cutting edge issues as a foundation for facilitating improved accounting education training scholarship and research in order to enhance the educational base of accounting practice The Routledge Companion to Accounting Education highlights the key drivers of change whether in the field of practice on the one hand e.g. increased regulation globalisation risk and complexity or from developments in the academy on the other e.g. pressures to embed technology within the classroom or to meet accreditation criteria on the other Thirty chapters written by leading scholars from around the world are grouped into seven themed sections which focus on different facets of their respective themes including student curriculum pedagogic and assessment considerations

Economic Influences on the Development of Accounting in Firms George J. Staubus,2021-12-29 A view of accounting as a practical activity a service function whose value depends on its adaptation to the environment in which it serves is a good place to start this book originally published in 1996 While arts such as music and drama can be said to serve human needs their development presumably cannot be explained primarily by reference to the economic features of their environments By contrast an economic service function such as accounting develops in response to economic features of its environment The objective of this book is to stimulate interest in explaining the development of specific features of accounting as we know it in the firms that are so important to the economies of Western industrialized countries by reference to the economic features of those firms The emphasis in this work is on the influence of economic features of the firm in the development of accounting

[The State of Food and Agriculture 2024](#) FAO,2024-11-08 Uncovering the true cost of food is the first step in making agrifood systems more inclusive resilient and sustainable As The State of Food and Agriculture 2023 revealed agrifood systems activities generate significant benefits for society but also have negative impacts on economic social and environmental sustainability The quantified hidden costs of agrifood systems amount to around 10 percent of global gross domestic product Therefore strategic action is necessary and all agrifood systems actors from producers and agribusinesses to consumers and governments have a crucial role to play While transforming agrifood systems would yield a net global gain the benefits and costs would be unevenly distributed among stakeholders and countries over time The State of Food and Agriculture 2024 builds on the findings of the 2023 edition delving deeper into the use of true cost accounting assessments of agrifood systems and identifying policy interventions aimed at transformation Using updated global datasets the report confirms previous estimates of the quantified hidden costs of agrifood systems and provides a detailed breakdown of the hidden costs associated with unhealthy dietary patterns and
