## **Advanced Handbook Cambridge English Language Assessment:**

Assessment in Second Language Pronunciation Okim Kang, April Ginther, 2017-07-14 Assessment in Second Language Pronunciation highlights the importance of pronunciation in the assessment of second language speaking proficiency. Leading researchers from around the world cover practical issues as well as theoretical principles enabling the understanding and application of the theory involved in assessment in pronunciation. Key features of this book include Examination of key criteria in pronunciation assessment including intelligibility, comprehensibility, and accentedness. Exploration of the impact of World Englishes and English as a Lingua Franca on pronunciation assessment. Evaluation of the validity and reliability of testing including analysis of scoring methodologies. Discussion of current and future practice in assessing pronunciation via speech recognition technology. Assessment in Second Language Pronunciation is vital reading for students studying modules on pronunciation and language testing and assessment.

Examining Listening Ardeshir Geranpayeh, Lynda B. Taylor, 2013-03-27 This volume examines the nature of second language listening proficiency and how it can be assessed. The book highlights the need for test developers to provide a clear explication of the ability constructs which underpin the tests they offer in the public domain. This is increasingly necessary if claims about the validity of test score interpretation and use are to be supported both logically and with empirical evidence. It operationalises a comprehensive test validation framework which adopts a socio-cognitive perspective. The framework embraces six core components: examining and then analysing Cambridge ESOL listening tasks from the following perspectives: Test Taker, Cognitive Validity, Context Validity, Scoring Validity, Criterion-related Validity, and Consequential Validity.

Its eight chapters provide a comprehensive and up-to-date analysis of pronunciation and the linguistic and social functions it fulfils. Topics include pronunciation in first and second language acquisition, instructional approaches, and factors impacting teachers' curriculum decisions, methods for assessing pronunciation, the use of technology for pronunciation teaching, learning and testing pronunciation, issues of teachers who are second language speakers, and applications of pronunciation research and pedagogy in L1 literacy and speech therapy, forensic linguistics, and health, workplace, and political communication. The chapters also critically examine the research base supporting specific teaching approaches and identify research gaps in need of further investigation. This rigorous work will provide an invaluable resource for teachers.
