Advances In Potato Chemistry And Technology:

Advances in Potato Chemistry and Technology Jaspreet Singh, Lovedeep Kaur, 2016-01-19 Advances in Potato Chemistry and Technology Second Edition presents the latest knowledge on potato chemistry including the identification analysis and uses of chemical components in potatoes Beginning with a brief description of potato components the book then delves into their role during processing then presenting information on strategies for quality optimization that provides students researchers and technologists working in the area of food science with recent information and updates on state of the art technologies The updated edition includes the latest information related to the identification analysis and use of chemical components of potatoes carbohydrate and non carbohydrate composition cell wall chemistry an analysis of glycoalkaloids phenolics and anthocyanins thermal processing and quality optimization In addition new and sophisticated methods of quality determination of potatoes and their products innovative and healthy potato based foods the future of genetically modified potatoes and the non food use of potatoes and their products is discussed Includes both the emerging non food uses of potato and potato by products as well as the expanding knowledge on the food focused use of potatoes Presents case studies on the problems factors proposed solutions and pros and cons of each allowing readers facing similar concerns and issues to effectively and efficiently identify an appropriate solution Written by a global collection of experts in both food and non food potato science

Potato Breeding: Theory and Practice John E. Bradshaw, 2021-04-09 The potato *Solanum tuberosum* is the world's fourth most important food crop after maize rice and wheat with 377 million tonnes fresh weight of tubers produced in 2016 from 19.2 million hectares of land in 163 countries giving a global average yield of 19.6 t ha¹ <http://faostat.fao.org> About 62% of production 234 million tonnes was in Asia 191 Africa 25 and Latin America 18 as a result of steady increases in recent years particularly in China and India As a major food crop the potato has an important role to play in the United Nations 2030 Agenda for Sustainable Development which started on 1 January 2016 <http://faostat.fao.org> By 2030 the aim is to ensure access by all people in particular the poor and people in vulnerable situations including infants to safe nutritious and sufficient food all year round By then the world population is expected to reach 8.5 billion and continue to increase to 9.7 billion in 2050 For potatoes the need is to increase production and improve nutritional value during a period of climate change a key aspect of which will be the breeding of new cultivars for a wide range of target environments and consumers The aim of the book is to help this endeavour by providing detailed information in three parts on both the theory and practice of potato breeding Part I deals with the history of potato improvement and with potato genetics Part II deals with breeding objectives divided into improving yield quality traits and resistance to the most important diseases and pests of potatoes Part III deals with breeding methods first the use of landraces and wild relatives of potato in introgression breeding base broadening and population improvement second breeding clonally propagated cultivars as a way to deliver potato improvement to farmers fields third as an alternative breeding potato cultivars for propagation through true potato seed and

fourth gene editing and genetic transformation as ways of making further improvements to already successful and widely grown cultivars Included are marker assisted introgression and selection of specific alleles genomic selection of many unspecified alleles and diploid F1 hybrid breeding

Snack Foods Sergio O. Serna-Saldivar,2022-04-20 The diverse segments of the snack industries that generate close to 520 billion of annual sales are adapting to new consumer expectations especially in terms of convenience flavor shelf life and nutritional and health claims **Snack Foods Processing Innovation and Nutritional Aspects** was conceptualized to thoroughly cover practical and scientific aspects related to the chemistry technology processing functionality quality control analysis and nutrition and health implications of the wide array of snacks derived from grains fruits vegetables milk and meat poultry seafood This book focuses on novel topics influencing food product development like innovation new emerging technologies and the manufacturing of nutritious and health promoting snacks with a high processing efficiency The up to date chapters provide technical reviews emphasising flavored salty snacks commonly used as finger foods including popcorn wheat based products crispbreads pretzels crackers lime cooked maize snacks tortilla chips and corn chips extruded items expanded and half products or pellets potato chips peanuts almonds tree nuts and products derived from fruits vegetables milk animal and marine sources **Key Features** Describes traditional and novel processes and unit operations used for the industrial production of plant and animal based snacks Depicts major processes employed for the industrial production of raw materials oils flavorings and packaging materials used in snack food operations Contains relevant and updated information about quality control and nutritional attributes and health implications of snack foods Includes simple to understand flowcharts relevant information in tables and recent innovations and trends Divided into four sections **Snack Foods** aims to understand the role of the major unit operations used to process snacks like thermal processes including deep fat frying seasoning packaging and the emerging 3 D printing technology Moreover the book covers the processing and characteristics of the most relevant raw materials used in snack operations like cereal based refined grits starches and flours followed by chapters for oils seasoning formulations and packaging materials The third and most extensive part of the book is comprised of several chapters which describe the manufacturing and quality control of snacks mentioned above The fourth section is comprised of two chapters related to the nutritional and nutraceutical and health promoting properties of all classes of snacks discussed herein

Underutilized Tuber Crops of the Himalayan Region Arun Kumar Gupta,Pradeep Singh Negi,2026-02-12 **Underutilized Tuber Crops of the Himalayan Region Nutraceutical Potential Processing and Applications** explores significant yet underutilized edible tubers known for their bioactive and pharmacological properties as well as their preservation potential The book presents detailed information on historical uses phytochemistry pharmacology distribution processing toxicity conservation and future prospects of these tubers along with their market relevance It also covers various processing and preservation techniques to maximize their utility as ingredients or additives in food products By integrating neglected and underutilized tubers into the

current agricultural portfolio alongside environmentally sustainable farming practices the book provides valuable insights for food scientists and agricultural professionals working to ensure a secure nutritious food supply while addressing the challenges of environmental change Covers underutilized edible tubers from around the world and their potential for nutraceutical applications Reviews the nutritional and pharmacological properties of underutilized tuber crops Supports global efforts in sustainable agriculture and agrobiodiversity by promoting neglected and underutilized tubers
