Geological and Soil Evidence Kenneth Pye, 2007-04-19 The forensic potential of geological and soil evidence has been recognized for more than a century but recently these types of evidence are used much more widely as an investigative intelligence tool and as evidence in court There is however still a poor understanding of the potential value and the limitations of geological and soil evidence among the forensic science and wider legal communities Geological and Soil Evidence Forensic Applications provides an authoritative introduction to the nature and properties of geological and soil materials that may be used as trace evidence and the techniques used to analyze and evaluate them It emphasizes the use of geoscience in forensic analyses including geophysical meteorological and geomorphological data This inclusive book covers material types and analytical strategies used in examining both the common components of geological evidence such as rocks dusts minerals spores and microfossils as well as anthropogenic particles like pottery and brick It instructs on particle characterization based on physical chemical and mineralogical traits such as color shape density and elemental and isotopic composition It also explains sampling and handling procedures particular to criminalistics and introduces analysis evaluation and decision making practices based on statistical significance and the weighing of different types of evidence Discussions of basic principles are supported and enhanced with numerous case studies that tie methods of analysis to specific forensic applications Examples are drawn from the author s own

experience as well as the wider scientific literature Accessible enough for readers with limited scientific knowledge and informative enough for scientists interested in forensic applications Geological and Soil Evidence Forensic Applications is a comprehensive reference for the current knowledge of forensic geology and soil science Intelligent Healthcare Surbhi Bhatia,Ashutosh Kumar Dubey,Rita Chhikara,Poonam Chaudhary,Abhishek Kumar,2021-07-02 This book fosters a scientific debate for sophisticated approaches and cognitive technologies such as deep learning machine learning and advanced analytics for enhanced healthcare services in light of the tremendous scope in the future of intelligent systems for healthcare The authors discuss the proliferation of huge data sources e g genomes electronic health records EHRs mobile diagnostics and wearable devices and breakthroughs in artificial intelligence applications which have unlocked the doors for diagnosing and treating multitudes of rare diseases The contributors show how the widespread adoption of intelligent health based systems could help overcome challenges such as shortages of staff and supplies accessibility barriers lack of awareness on certain health issues identification of patient needs and early detection and diagnosis of illnesses This book is a small yet significant step towards exploring recent advances disseminating state of the art techniques and deploying novel technologies in intelligent healthcare services and applications Describes the advances of computing methodologies for life and medical science data Presents applications of artificial intelligence in healthcare along with case studies and datasets Provides an ideal reference for medical imaging researchers industry scientists and engineers advanced undergraduate and graduate students and clinicians **Model Balloons and Flying Machines** John Henry Alexander,1910 **The Athenaeum** James Silk Buckingham,John Sterling,Frederick Denison Maurice,Henry Stebbing,Charles Wentworth Dilke,Thomas Kibble Hervey,William Hepworth Dixon,Norman Maccoll,Vernon Horace Rendall,John Middleton Murry,1905 *British Books in Print* ,1924 Current Literature ,1928 *Educational Times* ,1880 *The Athenaeum* ,1875 *Athenaeum and Literary Chronicle* ,1905 **Model Railroad Craftsman** ,1972 *The Practical Teacher* ,1882 The Bookseller ,1906 *The School World* ,1901 *Essentials of materia medica, therapeutics and prescription writing* Sir Henry Morris,1898
