[The Science and Art of Using Telescopes](#) Philip Pugh,2009-10-03 Amateur astronomers have to start somewhere Most begin by buying a modest astronomical telescope and getting to know the night sky After a while many want to move on to the next stage but this can be problematic The magazines advertise a mass of commercially made equipment some of it very expensive which can represent a major financial outlay The trick is to choose the right equipment and then use it to its fullest extent Observing Skills The Science and Art of using Astronomical Telescopes provides the required information First it explains how to get the best from entry level equipment that upgrade may not even be needed for a year or two Second it explains how to select
